## What is CoolTone?

CoolTone is an FDA-cleared body sculpting treatment. It builds, strengthens, and sculpts the body's major muscle groups, including the stomach muscles, buttocks, and legs.

## How Much Does CoolTone Cost?

The CoolTone cost varies depending on your treatment plan. The best way to determine how much Cool Toning will cost you is to schedule a consultation with a reputable provider in your area. During this visit, a specialist evaluates your body and determines if body sculpting is right for you. If it is, they create an affordable plan.

## How Long Does CoolTone Last? \*

Typical CoolTone plans include four cycles. The cycles are performed every 2 to 3 days. The best thing about CoolTone is that you enjoy progressive muscle building that continues for up to 6 months. As with any body sculpting treatment, results will vary per person. \*

## Does CoolTone Work?

Yes! CoolTone works. The treatments use powerful magnetic muscle stimulation technology (MMS). CoolTone sessions use electromagnetic energy, penetrating the muscles underneath. This current of energy causes the muscles to contract and release at a rapid pace. This energy effectively builds, tones, and firms existing muscles while simultaneously forming new ones.

[Learn more about CoolTone sessions>>](#)

## Does CoolTone Hurt?

CoolTone is a virtually painless body sculpting treatment. Especially when you compare this non-invasive treatment to surgical procedures. Some patients report feeling slight muscle soreness a few days afterward. However, this soreness is mild and will go away on its own.

## Am I the Right CoolTone Candidate?

CoolTone is not a suitable body treatment for everyone. If you question your candidacy for CoolTone cycles, schedule a consultation. The professional specialists determine if Cooltone is ideal for your body shape, size, and aesthetic goals.

## When Will I See My CoolTone Results? \*

CoolTone results are different for everyone. Most people report seeing results as soon as 3 to 4 weeks after their sessions are complete. As with any treatment, results vary. \*

## What Areas Can You Treat With CoolTone?

CoolTone stimulates muscle tissue in three major muscle groups. Treatment areas include:

**The Abdominals:** CoolTone strengthens the core and defines the abdominal muscles for a washboard ab look.

**The Buttocks:** Lift and tone the buttocks with this perfect non-invasive butt-lift alternative.

**The Upper Legs:** CoolTone sculpts and strengthens the thighs.

[Learn more about CoolTone cost>>](#)

## Is CoolTone Dangerous?

CoolTone has an impressive safety profile. No known risks or side effects are associated with this popular muscle-sculpting treatment. It is FDA-cleared and provides exceptional, safe results.

### CoolSculpting Chin | Reduce Double Chin Fat

Many people turn to CoolSculpting chin treatments to reduce fat in the submental region. It is a popular way to sculpt the chin because it is non-surgical and requires little downtime. In addition, CoolSculpting Elite reduces stubborn bulges via controlled cooling processes.

Has your double chin been making you self-conscious? Contour a lean neck and chin area with CoolSculpting chin treatments. Continue reading to learn more about this body contouring procedure.

#### What Causes Excess Neck Fat?

Double chins are common but can put a damper on one's confidence. Unhealthy choices do not always cause them: Fat deposits result from gender, age, hormones, and genetics.

Before CoolSculpting came about, liposuction was the only solution for treating double chin and neck fat. While it is an effective treatment, surgery requires a brutal recovery period. Today, it is possible to reduce submental fat without invasive procedures.

#### Are Double Chin Exercises Effective?

It is impossible to "spot reduce" fat. Therefore, double chin exercises will not shed fat in the submental area. Exercise should be part of a person's daily routine for optimal health. But for double chin fat reduction, no particular exercise can help.

Do you want to improve the appearance of your submental region? Consider a non-invasive fat reduction procedure like CoolSculpting chin treatment.

[Related Article: What is CoolSculpting?>>](#)

#### Double Chin Reduction with CoolSculpting Elite

CoolSculpting Elite is FDA-cleared to treat fat bulges on the body, including the submental region. The cooling technology banishes fat cells in targeted areas.

The original CoolSculpting treatment is a revolutionary body contouring solution. Since it came out, many people have been raving about it. They no longer have to undergo surgery to eliminate fat! The makers of the machine took it a step further to create CoolSculpting Elite. This upgraded system incorporates innovative new applicators that mold around the body's curves.

[Learn more about how CoolSculpting Elite works >>](#)

CoolSculpting Elite's applicators cover a larger cooling area than the original CoolSculpting ones. This means that specialists can treat two areas at the same time with one machine. Patients enjoy amazing results faster than before!

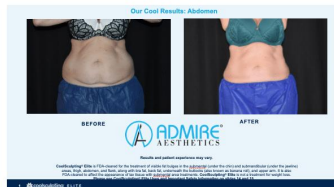

#### CoolSculpting Chin Results

It can take up to 3 to 4 months for CoolSculpting chin results to fully show. The body gradually metabolizes the killed fat cells. As they come out via the lymphatic system, patients notice the treatment area becomes smoother and tighter.

Since CoolSculpting destroys fat cells via Cryolipolysis, one can expect long-lasting results with the right post-treatment care. People who exercise daily and eat well can reap the benefits for a lifetime.

#### CoolSculpting Chin Before and After\*

CoolSculpting chin before and after pictures demonstrate the efficacy of fat-freezing treatments for reducing submental fullness. Just like with any aesthetic treatment, results vary per person.\* Get the most impressive CoolSculpting Elite results by choosing a reputable medical spa to perform this skill-sensitive procedure.

## How Does The Cool Sculpting Treatment Work Using CoolSculpting Elite?

Cool Sculpting with **CoolSculpting Elite** is a new, innovative fat-freezing treatment from Allergan. This new technology uses the same Cryolipolysis technology to eliminate stubborn fat deposits easily. With an upgrade in technology and applicators, the Cool Sculpting treatment with CoolSculpting Elite provides more dramatic body contouring results in less time and at more cost-effective prices.

Read on to learn more about the Cool Sculpting treatment and how CoolSculpting Elite works.

### Why Choose Cool Sculpting?

- Reduces fat cells without invasive surgery
- FDA-cleared safe and effective
- Scientifically proven
- Minimal downtime
- Sculpts a slim, contoured body
- Targets resistant fat bulges
- Millions of successful treatments performed around the world

### Cool Sculpting Treatment Before and After

Proof that the new CoolSculpting Elite works is evident in the Cool Sculpting before and after pictures. Each image shows how the cool sculpting treatment reduces noticeable fat deposits and contours a lean, sculpted physique. Best of all, Cool Sculpting Elite does this without surgery or a lengthy recovery, unlike surgical fat reduction treatments like liposuction. As with any cosmetic treatment, results may vary.\*

### How Does the Cool Sculpting Treatment Work?

Fat freezing is a simple principle to understand. Fat cells are not hardy like skin cells. When you expose fat cells to Cryolipolysis, they freeze, unlike skin cells and surrounding tissue that remain unharmed. When the fat cells freeze, the cellular structure of the cell is damaged. This causes the cell membrane to crystallize and eventually rupture, leaving it unable to store fat. The disabled cell can no longer function, so it eventually dies. Weeks after your treatment, the body collects the frozen or dead cells and processes them out of the body as waste.

### Cool Sculpting Treatment Areas

The CoolSculpting Elite machine is equipped with BRAND NEW technology. Unlike regular CoolSculpting treatments, CoolSculpting Elite features a new machine, dual applicator capability, and re-designed applicators. This allows your technician to contour multiple areas at the same time while simultaneously freezing more fat cells in less time.

Best of all, CoolSculpting Elite is approved to treat 9 total areas on the body. These include:

- Belly fat
- Flanks (love handles)
- Banana rolls under the buttocks
- Back fat
- Armpit fat
- Upper arm fat
- Double chins and neck fat
- Thigh fat
- Fat above the knee

### How Much Does a Cool Sculpting Treatment Cost?

CoolSculpting Elite cost varies per patient. Each cooling treatment is customized to fit each patient's unique needs depending on their body treatment area(s), and aesthetic body goals. Personalized plans also vary in price according to the number of treatment areas, size and type of applicator(s), and the number of cooling sessions.

## How Does CoolSculpting Elite Work? CoolSculpting Thighs in Grants Pass, Oregon

CoolSculpting Thighs is the best way to quickly reduce inner thigh fat and contour sleek outer thighs. The thighs are notorious for being a common trouble zone for women, and even men. If you struggle with saddlebags or stubborn inner thighs, CoolSculpting Elite may be your solution.

Learn more about CoolSculpting Elite, the revolutionary fat reduction treatment capable of eliminating twice the amount of fat in less time exclusively at [Admire Aesthetics](#).

### Benefits of CoolSculpting

- Safely & effectively reduces stubborn fat
- Non-Surgical Alternative to Liposuction
- Targets love handles, belly fat, thigh fat, double chins & more
- Treatments are virtually painless
- Non-invasive with no downtime
- Results look natural and are long lasting
- Define musculature and sculpt attractive curves

### How to Get Rid of Thigh Fat

For most women, thigh fat is a challenging problem. Known as "sex-specific fat," estrogen sends more fat cells to the thighs and buttocks. This fat reserve is supposed to give a woman extra energy during childbearing and breastfeeding.

Hormone-influenced fat is stubborn. And because spot reduction is a myth, you cannot squat or lunge thigh fat away. Therefore, there may not be a simple way to eliminate thigh fat for most women.

In fact, before the introduction of non-invasive technology, surgical liposuction was the only way to reduce thigh fat. Fortunately, today CoolSculpting Elite is the best treatment for the thigh area. CoolSculpting thighs require no surgery and minimal to no downtime.

### CoolSculpting on Thighs

CoolSculpting thighs is one of the most popular treatment applications for CoolSculpting Elite. With the new line of Elite applicators, women can contour their outer thighs, known as saddlebags. This device is specifically made to reduce external thigh fat.

For those who struggle with inner thigh fat, CoolSculpting can reduce fat and provide the coveted "thigh gap." CoolSculpting Elite's technology makes it possible to treat both thighs simultaneously. In addition, CoolSculpting Elite makes it possible to eliminate twice the amount of fat in the inner thighs in less time than the original treatment.

### CoolSculpting Thighs Before and After\*

The CoolSculpting thighs before and after pictures show how well CoolSculpting Elite freezes away stubborn fat. The images also show the dramatic fat reduction and body contouring possible with Allergan's new technology and applicators. As with all body contouring procedures, results may vary.\*
