Invoice Number FB2023-244
Date of Issue 07/01/2023
Due Date 07/01/2023

Amount Due (USD) \$0.00

Description	Rate	Qty	Line Total
-------------	------	-----	------------

Digital Marketing Monthly Management Service	\$1,500.00	1	\$1,500.00
--	------------	---	------------

- Manage & optimize digital marketing campaigns on Google Adwords
- Optin technology to increase conversions.
- Call tracking & reporting
- Monitor budget and adjust bids to gain better ROI
- Manage keyword selection and audience targeting
- Call tracking and monitoring
- Conversion Tools + Lead Nurture Technology

Monthly marketing services commence after completion of ad campaign set up.

A three-month monthly management term is required. Set up and monthly management fee does not include media costs. Client will be responsible to pay media costs directly to Google & Facebook.

MONTHLY SEARCH ENGINE OPTIMIZATION (SEO)	\$1,500.00	1	\$1,500.00
--	------------	---	------------

CONTENT: (2) 500+ word article(s) published to the blog each month. Articles include multimedia (i.e., images and videos, etc.). *The article(s) may be substituted for content added to service pages instead of the blog.

ON-SITE SEO: Monthly website optimization and management, including improvements to design or development following industry best practices for technical SEO. May include adding more content (i.e., text, images, multimedia) to service pages.

LOCAL SEO:

- Google Business Profile: Creation, management, and monthly updates to the client's Profile.
- Listings in online directories.
- Management of Google Maps listing.

DATA MONITORING AND REPORTING:

- Set-up and management of Google Search Console
- Data monitoring from various SEO tools to ensure optimal performance
- Regular SEO reporting to the client

Web Development	\$100.00	1	\$100.00

How Does CoolSculpting Elite Work? CoolSculpting Thighs in Grants Pass, Oregon

CoolSculpting Thighs is the best way to quickly reduce inner thigh fat and contour sleek outer thighs. The thighs are notorious for being a common trouble zone for women, and even men. If you struggle with saddlebags or stubborn inner thighs, CoolSculpting Elite may be your solution.

Learn more about CoolSculpting Elite, the revolutionary fat reduction treatment capable of eliminating twice the amount of fat in less time [exclusively at Admire Aesthetics](#).

Benefits of CoolSculpting

- Safely & effectively reduces stubborn fat
- Removes 20-25% fat in a single treatment
- Non-Surgical Alternative to Liposuction
- 35-minute treatments
- Targets love handles, belly fat, thigh fat, double chins & more
- Treatments are virtually painless
- Non-invasive with no downtime
- Results look natural and are long lasting
- Define musculature and sculpt attractive curves

How to Get Rid of Thigh Fat

For most women, thigh fat is a challenging problem. Known as "sex-specific fat," estrogen sends more fat cells to the thighs and buttocks. This fat reserve is supposed to give a woman extra energy during childbearing and breastfeeding.

Hormone-influenced fat is stubborn. And because spot reduction is a myth, you cannot squat or lunge thigh fat away. Therefore, there may not be a simple way to eliminate thigh fat for most women.

In fact, before the introduction of non-invasive technology, surgical liposuction was the only way to reduce thigh fat. Fortunately, today CoolSculpting Elite is the best treatment for the thigh area. CoolSculpting thighs require no surgery and minimal to no downtime.

CoolSculpting on Thighs

CoolSculpting thighs is one of the most popular treatment applications for CoolSculpting Elite. With the new line of Elite applicators, women can contour their outer thighs, known as saddlebags. Thanks to the new C-cup curve series design, the Elite applicators allow for better suction and 18% more cooling coverage. As a result, this device is specifically made to reduce external thigh fat.

For those who struggle with inner thigh fat, CoolSculpting can reduce fat and provide the coveted "thigh gap." CoolSculpting Elite's updated technology makes it possible to treat both thighs simultaneously. CoolSculpting Elite offers dual applicators capable of treating multiple areas at once. This saves time while reducing the number of appointments needed to achieve your desired results.

In addition, CoolSculpting Elite makes it possible to eliminate twice the amount of fat in the inner thighs in less time than the original treatment. CoolSculpting Elite removes 20-25% fat in a single treatment, compared to its predecessor which removes an average of 18-20% fat during each session.

How Does CoolSculpting Work?

During a CoolSculpting Elite thigh treatment, a special cooling device is placed over fatty bulges on the inner or outer thigh area. The Elite applicator suctions to the skin and slowly cools the temperature of the fat cells until they are completely frozen. As a result, the subcutaneous fat cells are destroyed, and the surrounding skin and tissue remain undamaged. CoolSculpting Elite feels like a pulling or pinching sensation until the treatment area is completely numb.

During the cool-down period of the treatment, these sensations are followed by an intense cold feeling. As cold is applied and the treatment area becomes numb, it can cause a stinging or tingling sensation in the thigh area. These sensations usually go away on their own. In general, CoolSculpting Elite thighs is a pain-free process with little to no discomfort.

Over the next several weeks, the lymphatic system collects the destroyed fat cells. They are filtered through the kidneys and removed from the body as waste. By reducing the number of fat cells, individuals can see great reductions in stubborn fat bulges from the thigh areas. CoolSculpting Elite provides long-lasting fat reduction because, once destroyed, the fat cells can never return to the thighs.

CoolSculpt Multiple Areas Simultaneously

Another incredible benefit of CoolSculpting Elite is that it can target numerous areas of the body at once in a single treatment session. This method is called DualSculpting and refers to two CoolSculpting treatments happening at the same time to freeze fat in two areas of the body. For a CoolSculpting Elite thigh treatment session, dual applicators are placed on both thighs. These applicators emit calibrated cooling to the inner or outer thighs, reducing fat cells at once. Up to four different areas of the body can be treated at the same time with CoolSculpting Elite. For the thighs, it is possible to treat the inner and outer thighs simultaneously. Aside from the thighs, the underarms and love handles are additional popular DualSculpting treatment options.

CoolSculpting Elite vs. Cryoskin Slimming

Both CoolSculpting and Cryoslimming can provide long-term fat reduction for the thighs. Cryoskin is a popular body-shaping treatment that eliminates unwanted body fat and tones and tightens the skin. Cryoslimming also reduces the appearance of cellulite and increases collagen production. It utilizes heat and cold therapy, causing your fat cells to freeze, break down, and become eliminated.

Compared to Cryoskin, CoolSculpting Elite results take a bit longer to notice, but fewer treatment sessions are needed overall. Additionally, CoolSculpting clinical studies found that patients experience up to 25% fat reduction in targeted areas after a single treatment session. This is far superior compared to Cryoslimming results, which deliver an average fat reduction of 38% after a series of 5 treatments. Overall, patients looking for maximum fat reduction would opt for CoolSculpting Elite.

CoolSculpting vs. EMSculpt

EMSculpt and CoolSculpting Elite are two advanced body contouring treatments that can help create firmer, more toned thighs. EMSculpt uses breakthrough technology that destroys fat cells and simultaneously builds and tones muscle tissue. CoolSculpting Elite uses technology that freezes fat cells and achieves permanent fat reduction.

If you want to achieve maximum fat reduction in troublesome problem areas like the inner thighs or saddlebags, CoolSculpting Elite would be an ideal treatment option for you. This is because CoolSculpting Elite can target and destroy a higher amount of stubborn fat cells per treatment session compared to an EMSculpt treatment session. Clinical studies found that patients experience 25-30% fat reduction in targeted areas after a single CoolSculpt Elite treatment session. EMSculpt, on the other hand, is only able to dissolve stubborn fat by 20% per treatment session.

CoolSculpting Thighs Before and After*

The CoolSculpting thighs before and after pictures show how well CoolSculpting Elite freezes away stubborn fat. The images also show the dramatic fat reduction and body contouring possible with Allergan's new technology and applicators. As with all body contouring procedures, results may vary.*

CoolSculpting Chin | Reduce Double Chin Fat

Many people turn to CoolSculpting chin treatments to reduce fat in the submental region. It is a popular way to sculpt the chin because it is non-surgical and requires little downtime. In addition, CoolSculpting Elite reduces stubborn bulges via controlled cooling processes.

Has your double chin been making you self-conscious? Contour a lean neck and chin area with CoolSculpting chin treatments. Continue reading to learn more about this body contouring procedure.

What Causes Excess Neck Fat?

Double chins are common but can put a damper on one's confidence. Unhealthy choices do not always cause them. Fat deposits result from gender, age, hormones, and genetics.

Before CoolSculpting came about, liposuction was the only solution for treating double chin and neck fat. While it is an effective treatment, surgery requires a brutal recovery period. Today, it is possible to reduce submental fat without invasive procedures.

Are Double Chin Exercises Effective?

It is impossible to "spot reduce" fat. Therefore, double chin exercises will not shed fat in the submental area. Exercise should be part of a person's daily routine for optimal health. But for double chin fat reduction, no particular exercise can help.

Do you want to improve the appearance of your submental region? Consider a non-invasive fat reduction procedure like CoolSculpting chin treatment.

Are Kybella Injections Effective?

Recently, Kybella has become a popular method for improving a double chin. Kybella is a liquid injection that is used to melt fat cells in the chin. However, Kybella comes with many drawbacks as it is a more invasive option.

A major risk with Kybella is the possibility of extensive swelling, bruising, and pain at the injection site. Post-Kybella swelling lasts for about a month with maximum swelling in the first weeks. Another major drawback with Kybella injections is the risk of nerve damage, which can cause temporary weakness or numbness in the treated area.

For individuals who want to reduce their double chin without painful injections and long recovery, CoolSculpting Elite is non-invasive and generally safer. Redness and numbness are the most common side effects, and no needles or injections are involved.

Double Chin Reduction with CoolSculpting Elite

CoolSculpting Elite is FDA-cleared to treat fat bulges on the body, including the submental region. The cooling technology banishes fat cells in targeted areas.

The original CoolSculpting treatment is a revolutionary body contouring solution. Since it came out, many people have been raving about it. They no longer have to undergo surgery to eliminate fat! The makers of the machine took it a step further to create CoolSculpting Elite. This upgraded system incorporates innovative new applicators that mold around the body's curves.

CoolSculpting Elite's applicators cover a larger cooling area than the original CoolSculpting ones. This means that specialists can treat two areas at the same time with one machine. Patients enjoy amazing results faster than before!

How a CoolSculpting Elite Treatment Works on the Chin

CoolSculpting is a non-invasive fat reduction alternative. This FDA-cleared treatment is an excellent option for those who fear needles or do not want to experience lengthy recovery time. CoolSculpting uses fat-freezing technology called cryolipolysis to cool undesired fatty tissue in the chin area.

During the treatment, a cooling gel is applied to the area. Then, the CoolSculpting applicator is applied to the selected fat pocket under the chin. The unique applicator has a sticky gel pad that helps to protect the skin. Vacuum suction holds the area in place, causing a pulling sensation. The device then cools the area and freezes the fat cells. After the treatment concludes, the applicator is removed. The frozen fat area is massaged for about two minutes to enhance the sculpting effect.

Once the fat cells are frozen, they are crystallized and die, and the body naturally gets rid of them over time via your lymphatic system. As a result, this method can help make the chin area look slimmer and more toned. Overall, CoolSculpting Elite is a safe and effective way to improve the definition of your chin and jawline.

CoolSculpting sessions take about 45 minutes. A series of three treatments is recommended, depending on your aesthetic goals. After each treatment session, patients may experience slight redness, numbness, and swelling. These symptoms go away on their own. There is no downtime with CoolSculpting Elite, and patients can return to their normal activities following their treatment.

Does CoolSculpting Chin Fat Hurt?

CoolSculpting Elite is a safe, non-invasive alternative to painful surgeries like liposuction that require going under the knife and excessive downtime to recover. CoolSculpting is generally painless and requires no downtime after treatment. However, patient experience varies. Some individuals experience mild discomforts, such as tightness or a pinching sensation. The manual massage of the frozen fat area may also be uncomfortable for patients but not severely painful.

CoolSculpt Double Chin + Tummy Simultaneously

Another great advantage of CoolSculpting Elite is that it can treat numerous areas of the body at once in a single treatment session. CoolSculpting multiple areas simultaneously is an effective way to save time and achieve superior results. This "DualSculpting" method involves using two machines at the same time. Dual applicators are placed on multiple targeted areas and deliver precise cooling to destroy fat cells completely.

A popular CoolSculpting Elite combination treatment is to target the double chin and belly at the same time. Belly fat is often diet and exercise-resistant and is one of the most challenging places to lose fat. Treating multiple areas at once, such as the chin and tummy, is an effective way to save time and avoid surgery, complications, scarring, and downtime.

The Benefits of CoolSculpting Elite on Chin Fat

- Safe, FDA-cleared treatment
- Non-invasive fat reduction
- Painless
- Reduces double chin, neck fat, and jowls
- Requires no recovery or downtime
- Clinically proven
- Results in 1-2 visits
- Natural-looking results

CoolSculpting Chin Results

It can take up to 3 to 4 months for CoolSculpting chin results to fully show. The body gradually metabolizes the killed fat cells. As they come out via the lymphatic system, patients notice the treatment area becomes smoother and tighter.

CoolSculpting the double chin area has a high success rate and produces long-lasting results. Generally, patients notice a reduction in their double chin at four to five weeks after treatment. On average, CoolSculpting clinical studies found that 77% of patients showed improved appearance of fatty tissue in the chin area. Additionally, 75% of patients reported that their chin looked more toned following a CoolSculpting treatment.

Since CoolSculpting destroys fat cells via Cryolipolysis, one can expect long-lasting results with the right post-treatment care. People who exercise daily and eat well can reap the benefits for a lifetime. The duration of these results depends on things like aging, genetics, and weight gain. For example, with significant weight gain it is possible that the remaining fat cells in the area can increase in size. It is important to have realistic goals about what a chin fat reduction treatment can achieve.
