

## HOW MUCH DOES COOLSCULPTING COST? DETERMINING COOLSCULPTING PRICES

Home » [Blog](#) » [How Much Does CoolSculpting Cost?](#) Determining CoolSculpting Prices

Posted on: Jul 10 2020 By: Always Beautiful Medical Spa Leave a response

CoolSculpting costs remains a valid consideration when deciding whether CoolSculpting is right for you. Yet, overall prices vary per person, depending on the individual's treatment plan. At Always Beautiful Medical Aesthetics and Cosmetics, a skilled practitioner devotes time to delivering optimal treatment plans. Read on to learn the elements involved in CoolSculpting prices and how you can save money on [the cool sculpting treatment](#).

### THE COOLSCULPTING TREATMENT

To comprehend CoolSculpting prices, it is helpful to understand the fat freezing process. To start, a CoolSculpting expert places an applicator over a stubborn bulge. The applicator then draws subcutaneous fat cells to the surface and freezes them to death, using controlled cooling. One cooling session using a single applicator constitutes a cycle. A cycle may last 30 minutes to 90 minutes, depending on the size of the applicator.

### HOW MUCH DOES COOLSCULPTING COST?

CoolSculpting prices are calculated by the type and size of applicators used and the number of cycles performed. Minored treatments, such as love handles, require an applicator on each flank and make up two cycles.

### THE SIZE AND SHAPE OF THE APPLICATORS

CoolSculpting applicators come in various shapes and sizes, each uniquely manufactured to contour to precise areas of the body. This allows for versatility in the fat freezing process. The patient's body size and shape will determine the type and size of the applicator necessary in achieving a pristine physique.

Different patients may utilize different applicators or require a different number of cycles, even when treating the same area. For example, when targeting belly fat, one person may require two small applicators. Another person may need one large applicator. Combining one large applicator with one small applicator may create the precise configuration for another individual. These different collaborations impact overall pricing. During your complimentary consultation, your CoolSculpting provider will evaluate your body and your aesthetic goals and inform you of which applicator combinations will provide the best results.

Applicators cost different amounts according to their size. A large applicator covers double the skin area compared to a small applicator. Thus, a single cycle using a large applicator costs double what a single cycle costs using a small applicator.

In addition to size—specialty applicators target specific areas of the body. For example, the CoolMini treats the submental region, targeting both neck fat and double chins. Since the CoolMini is a specialty applicator, a single cycle price will differ from other applicators.

### HOW TO SAVE ON COOLSCULPTING COST?

There are numerous ways to save on CoolSculpting cost. Purchasing a treatment package can provide you a substantial discount. CoolSculpting specials offer additional savings on your fat freezing treatment.
