Show

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

CONTRAST

- Background and foreground colors do not have a sufficient contrast ratio. Show

These are opportunities to improve the legibility of your content.

NAMES AND LABELS

- `<frame>` or `<iframe>` elements do not have a title Show
- Links do not have a discernible name Show

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).
