Tia was treated with CoolTone™ on her buttocks. Before and after photos are not of Tia. Results may vary.

Uses

The CoolTone™ device is FDA-cleared for improvement of abdominal tone, strengthening of the abdominal muscles, and development for firmer abdomen. CoolTone™ is also FDA-cleared for strengthening, toning, and firming of buttocks and thighs.

Important Safety Information

The CoolTone™ procedure is not for everyone. CoolTone™ should not be used in the head or heart area. You should not have the CoolTone™ treatment in areas with metal or electronic implants/devices like cardiac pacemakers, implanted hearing devices, implanted defibrillators, implanted neurostimulators, drug pumps, and hearing aids. Tell your doctor if you have any medical conditions and any known sensitivities or allergies as CoolTone™ should not be used over menstruating uterus, over areas of the skin that lack normal sensation, in areas of new bone growth, or in patients with fever, malignant tumor, hemorrhagic conditions, epilepsy, recent surgical procedure, pulmonary valve defect, pregnancy, sensitivity or allergy to latex.

CoolTone™ should be used with caution in patients with Graves' disease (an autoimmune disorder that causes overactive thyroid), active bleeding disorders, or seizure disorders.

Women who are close to menstruation may find that it comes sooner, or cramping is increased or intensified with CoolTone™ treatments, therefore, it is recommended to not undergo treatment during this time of the month.

Side effects may include, but are not limited to, muscular pain, temporary muscle spasm, temporary joint or tendon pain, and redness at or near the treatment site.

Ask your Healthcare Provider if CoolTone™ is right for you.
