Responsive search ad Leave feedback Custom Jan 1 - Mar 31, 2023 Show last 30 days

**Assets** Combinations

Your ads are all set! They'll have a higher chance of performing well.

**Ad strength** Excellent

- Add more headlines
- Include popular keywords in your headlines
- Make your headlines more unique
- Make your descriptions more unique

**Search term categories your ad appears for**  
coolsculpting, coolsculpting chicago, coolsculpting near me, + 183 more

You can now edit advertiser assets. Point to the asset column, then click the pencil icon.

Responsive search ads usually need around 2,000 impressions in the "Google Search: Top" segment over 30 days to display a rating in the Performance column. [Learn more](#)

**Concierge Med Spa** Sponsored

Freeze away fat with CoolSculpting Elite from the #1 provider in Chicago, Concierge Aesthetics & Plastic Surgery.

CoolSculpting utilizes advanced cooling technology to eliminate fat cells, safely, painlessly, & effectively.

A SOLUTION that targets stubborn bulges that resist diet & exercise.

Frozen fat cells are removed from the body for good.

Freeze away belly fat, love handles, upper arm fat, bra bulge, thigh fat, double chins, and other bulges.

**Benefits of CoolSculpting:**

- ✔ Non-surgical alternative to liposuction
- ✔ Treatments take as little as 35 minutes
- ✔ Requires minimal to no downtime
- ✔ Targets stubborn bulges
- ✔ Helps define musculature
- ✔ Natural-looking, long-lasting results

Book your treatment and say goodbye to stubborn bulges!

Now for a limited time, get 50% Off 16+ Treatments

#### BENEFITS OF COOLSCULPTING ELITE

- #1 Non-invasive fat reduction treatment in the world
- Safe and effective
- Reduces stubborn fat deposits
- Non-surgical alternative for liposuction
- Long-lasting results
- Target bulges that resist diet & exercise
- FDA cleared and clinically proven
- Look better & feel more confident
- Easy, 35-minute treatments
- Millions of treatments performed worldwide

#### HOW COOLSCULPTING ELITE WORKS

This revolutionary fat freezing treatment uses the science of cryolipolysis to reduce stubborn fat bulges. Broken down, cryolipolysis means the reduction of fat cells through exposure to controlled cooling, cryo meaning cold, lipo meaning fat, lysis meaning cell destruction. Cryolipolysis has been scientifically proven to effectively reduce stubborn bulges that are especially resistant to diet and exercise. In addition, this treatment is virtually painless, safe, and effective.

Treatments are virtually painless and take about 35 minutes to complete. As CoolSculpting Elite is non-invasive and requires no anesthesia, many patients choose to multitask during their treatment time by reading, conversing, or even sleeping. Many can resume daily activity immediately. As with any cosmetic treatment, individual experiences will vary.

#### AREAS COOLSCULPTING ELITE CAN TREAT

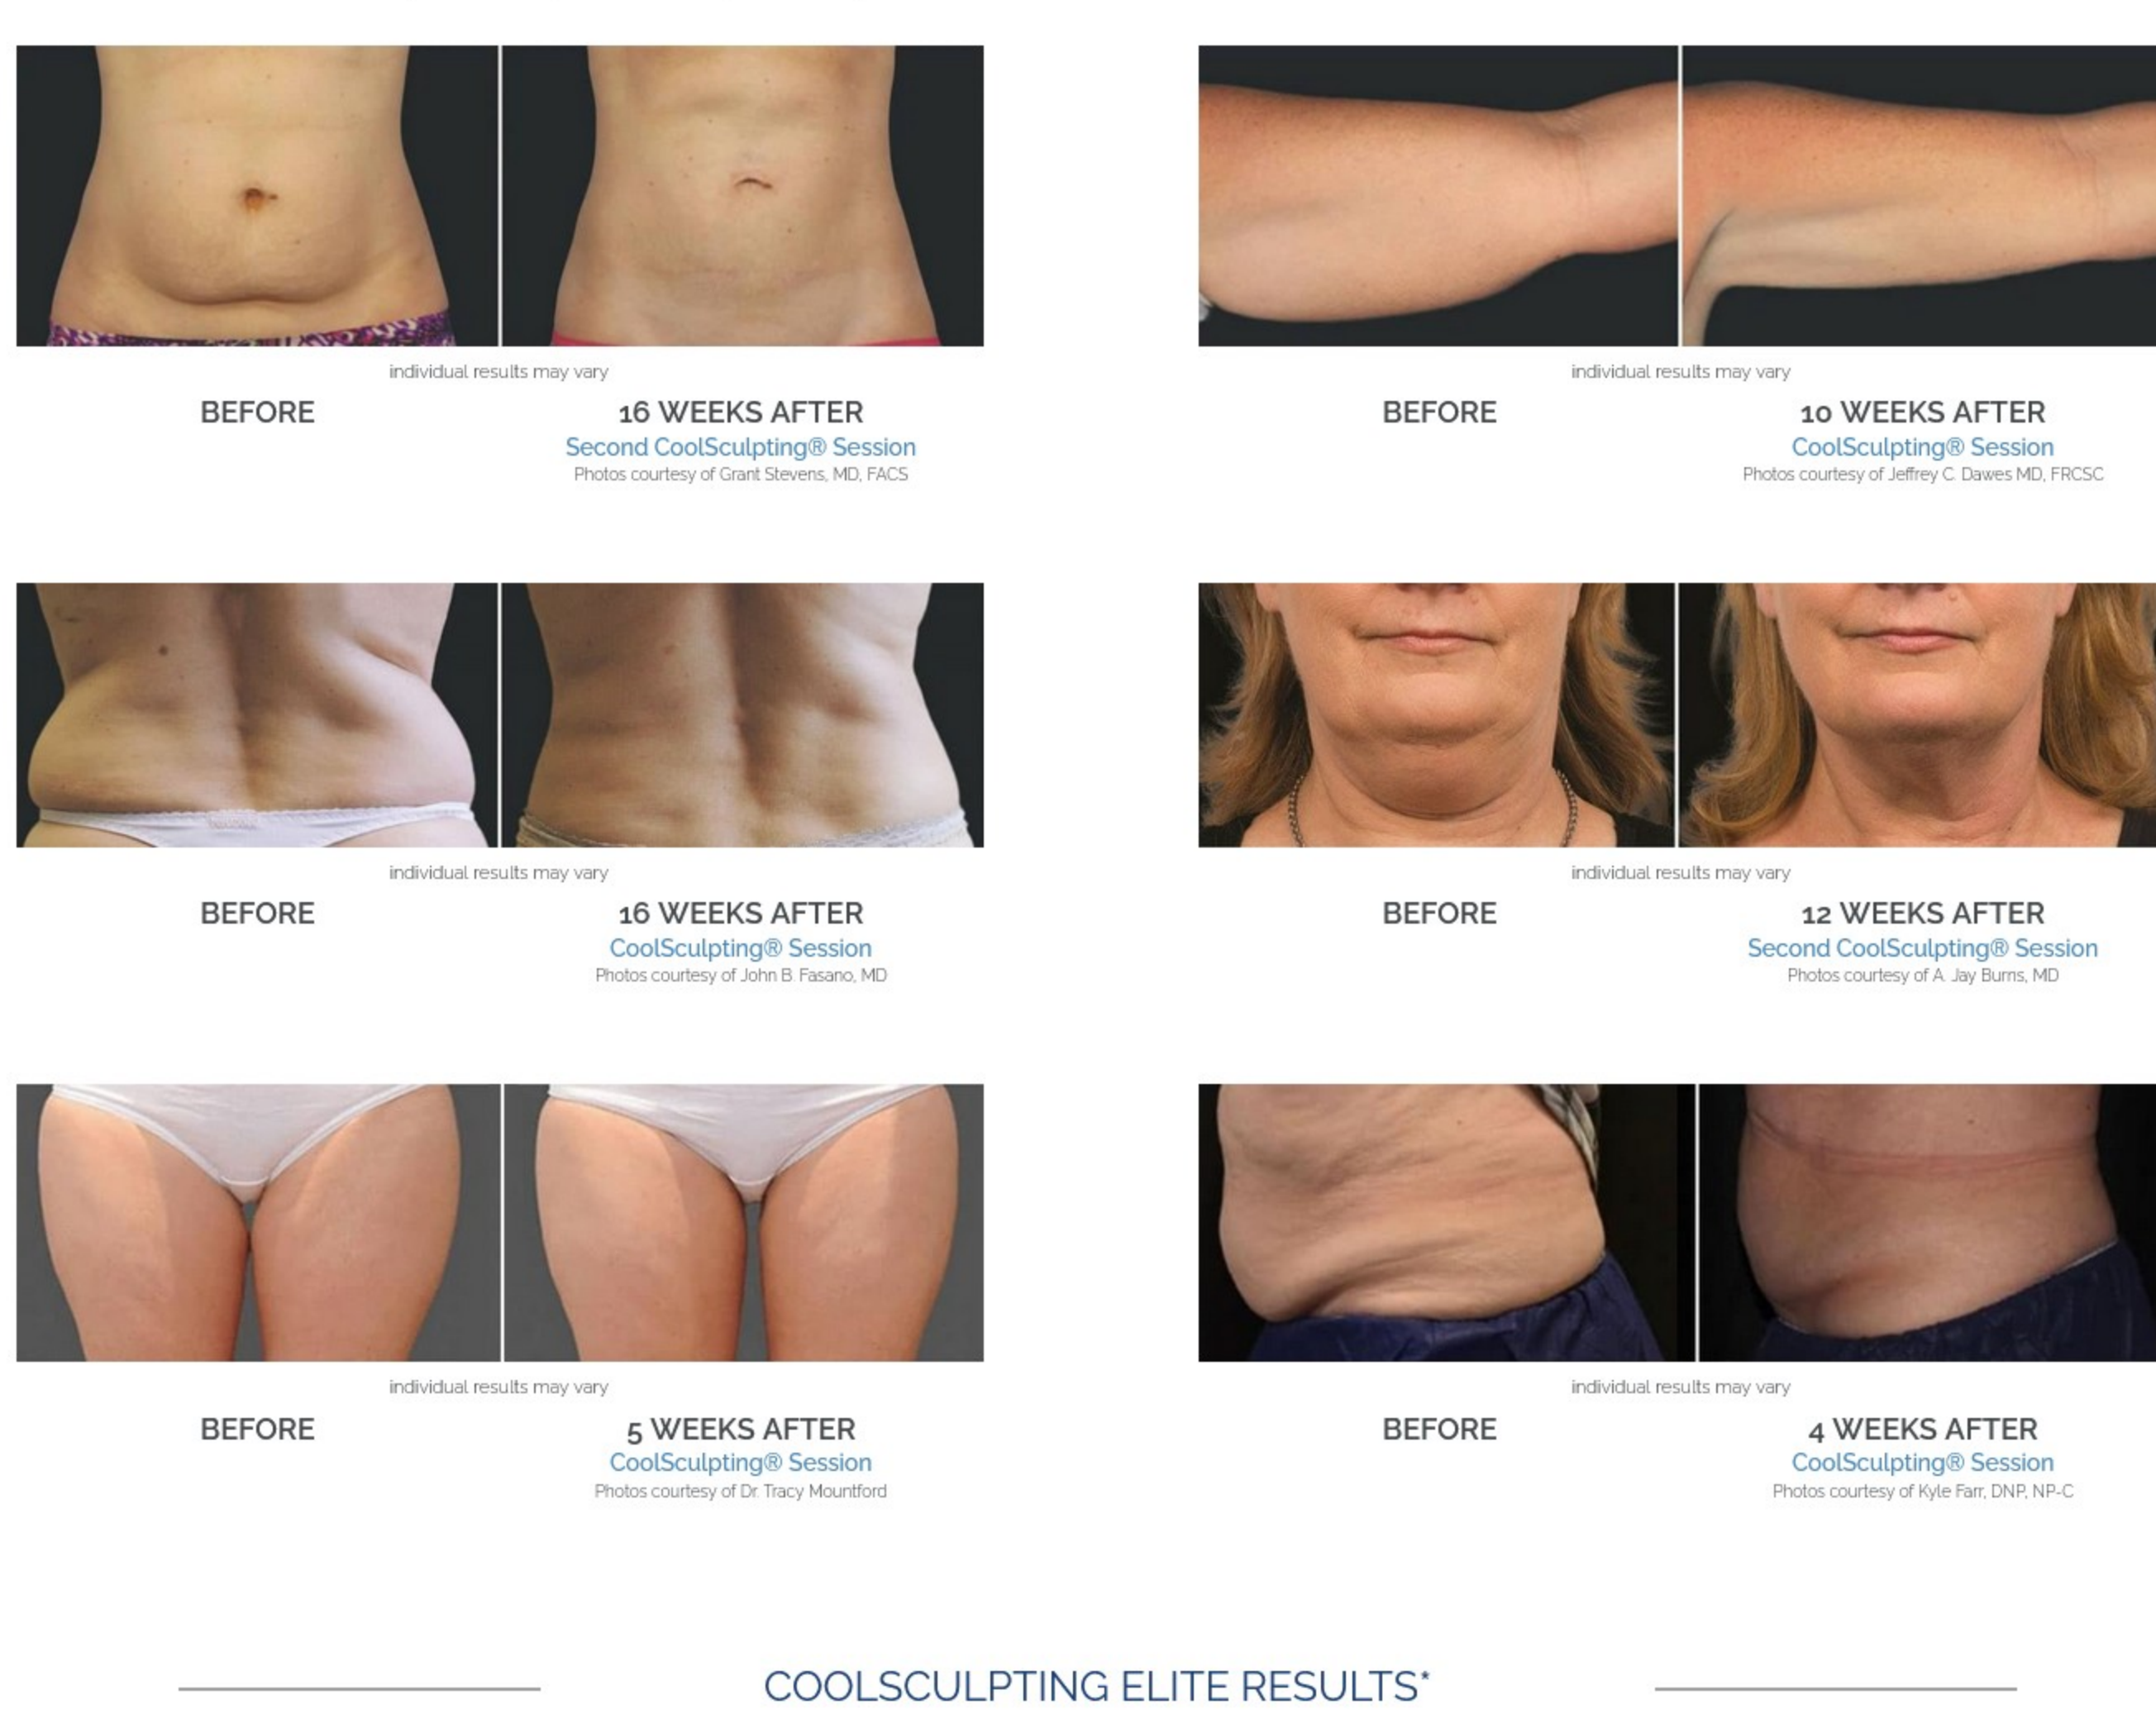

The CoolSculpting Elite machine is equipped with several applicators of various sizes and shapes. The versatility in applicators allows Concierge Aesthetics & Plastic Surgery to freeze stubborn fat, starting with a double chin, ending with fat above the knees, and all notorious bulges in between. Popular treatment areas for freezing fat include:

- The abdomen (targeting belly fat)
- The flanks (targeting love handles)
- Legs (targeting inner and outer thigh fat)
- The back
- The upper arms
- The submental region (targeting double chins and neck fat)
- The chest (ideal for men wanting to reduce boobs or man boobs)
- The amptit (targeting "bra bulge")

#### SEE THE COOLSCULPTING ELITE BEFORE AND AFTERS\*

CoolSculpting Elite before and after images attest to how well fat freezing works. As with any body contouring treatment, results may vary. However, the men and women depicted in these CoolSculpting Elite before and after pictures are actual patients and demonstrate the amazing transformation that can result when a skilled and experienced professional performs your treatment.

#### COOLSCULPTING ELITE RESULTS\*

CoolSculpting Elite works differently than weight loss programs and liposuction. CoolSculpting Elite results last. Both weight loss programs and liposuction seek to shrink fat cells. Through cryolipolysis, fat cells crystallize and rupture. These cells are no longer functional, and the body processes them out as waste via the lymphatic system. Once these fat cells are gone, they are gone for good and cannot grow back. However, excessive weight gain may obscure CoolSculpting Elite results. So it is recommended to follow a healthy lifestyle after treatment to maintain optimal results and a sculpted physique.

#### COOLSCULPTING ELITE SAFETY

CoolSculpting Elite is both scientifically proven<sup>1</sup> and FDA cleared as safe and effective. Because fat freezing eliminates fat cells in a non-invasive manner, CoolSculpting side effects are rare. Nevertheless, the best way to ensure a safe treatment as well as optimal results is to choose a reputable CoolSculpting Chicago provider who is highly experienced in the best freezing procedure.

While long-term CoolSculpting side effects and adverse events are rare, it is not uncommon for patients to experience symptoms associated with an immune response following their treatment. This may include redness, tenderness, bruising, or numbness. These symptoms are typically mild, isolated to the treatment area, and resolve themselves within a few days.<sup>2</sup>

#### COOLSCULPTING ELITE REVIEWS

CoolSculpting Elite reviews are raving. Moreover, they are not just coming from patients. The medical community is impressed by how well fat freezing works, as demonstrated by the numerous clinical studies and papers published in academic literature. One of the most well-known studies evaluated more than 500 CoolSculpting patients and found that **"99% of respondents reported a positive perception of treatment duration and 96% reported minimal to tolerable discomfort."** The study concluded, **"Cryolipolysis is a safe, well-tolerated, and effective treatment method for reduction of subcutaneous fat."**

Another CoolSculpting review published in scientific literature measured how much fat can actually be reduced from a single CoolSculpting treatment. The study found **"cryolipolysis was shown to reduce subcutaneous fat at the treatment site by up to 25% after one treatment."**<sup>2</sup>

#### COOLSCULPTING VS LIPOSUCTION

Before introducing nonsurgical and non-invasive procedures, people had to undergo surgical procedures like liposuction to reduce unwanted fat. Liposuction is indeed an effective fat-reduction treatment. However, it is a surgical procedure involving incisions, anesthesia, a complicated recovery, and sometimes scars.

Now, people struggling with fat bulges can use CoolSculpting Elite as a no-surgery-required way to reduce fat cells. CoolSculpting Elite targets common trouble zones like the stomach, thighs, and back fat. Best of all, treatments are entirely nonsurgical and non-invasive. Patients can enjoy their CoolSculpting Elite treatment and continue their usual daily routine. There is minimal downtime and no surgical risks like liposuction.

However, some people are not eligible for CoolSculpting Elite. For example, if someone is significantly overweight, they may not be able to have cooling cycles. Instead, they would have to trust liposuction to reduce their fat bulges. It is important to know that CoolSculpting Elite is a body contouring treatment for healthy and active adults close to their ideal weight and body size but still struggling with fat cells in problem areas.

Concierge Aesthetics & Plastic Surgery offers both CoolSculpting Elite and liposuction. Schedule a consultation if you are struggling with excess fat cells and want to achieve a slimmer, leaner physique. We will evaluate your body during your visit and listen to your aesthetic goals. We can help you determine which fat reduction method is best for your body and goals.

#### COOLSCULPTING COST IN CHICAGO

CoolSculpting Elite cost differs for each patient, depending on the unique parameters of the individual's customized treatment plan. Factors that affect CoolSculpting cost include the size of applicator, the number of cooling cycles needed to achieve the desired results, and the number of treatment areas. One of the best ways to save on fat freezing is to purchase a treatment package of multiple cooling cycles.

During your free consultation with Concierge Aesthetics, we will discuss CoolSculpting prices in detail. If fat freezing is right for you, we will help create a customized treatment plan that is tailored to your body, your goals, and your budget.

**As the premier CoolSculpting Chicago provider, Concierge Aesthetics & Plastic Surgery is offering new clients who schedule a complimentary consultation 25% off the cost of CoolSculpting.**

#### COOLSCULPTING ELITE FAQs

**WHEN WILL I SEE MY COOLSCULPTING RESULTS?**

After a CoolSculpting Elite treatment, the lymphatic continues to process out frozen fat cells over several weeks. Individual results will vary, but some patients are able to see visible results in as little as 4 weeks. For most patients, however, CoolSculpting Elite results take about 8 - 12 weeks to be fully manifest. Although some patients with CoolSculpting Elite results were immediate, many appreciate the pace of natural weight loss that occurs with CoolSculpting Elite. As always, individual experiences will be different.

**AM I A GOOD CANDIDATE FOR COOLSCULPTING ELITE?**

#### EXPERIENCE THE BEST COOLSCULPTING ELITE TREATMENTS IN CHICAGO

If you have tried countless diets and exercise routines but still struggle with fat bulges that refuse to budge, CoolSculpting can help! Reduce fat cells, contour attractive curves, and achieve the fat reduction you have wanted so badly without countless hours in the gym or invasive surgery.

Contact Concierge Aesthetics & Plastic Surgery today! **We are proud to be the leading provider of non-surgical body contouring treatments.** Schedule your **CoolSculpting Elite in Chicago**. We proudly offer top-rated treatments in Chicago's Gold Coast, Naperville, Barrington, and Geneva. ### COOLSCULPTING FOR MEN: HOW FAT FREEZING IMPROVES MALE PHYSIQUES

CoolSculpting is the most popular non-invasive fat reduction method in the world. Fat freezing safely and effectively reduces stubborn fat cells by exposing them to a precise, controlled cooling. CoolSculpting literally freezes away fat. The innovative treatment is safe and virtually painless, using no needles or scalpels, and requires little to no downtime, making CoolSculpting the perfect alternative to liposuction.

Read on to [learn more about CoolSculpting](#) for men and why more male clients utilize this treatment to reduce fat.

#### WHAT IS COOLSCULPTING?

CoolSculpting is a body contouring treatment that reduces fat cells without surgery or a lengthy recovery period. Using the advanced cooling technology known as Cryolipolysis, CoolSculpting exposes stubborn fat cells to a calibrated cooling. The extreme cooling temperature causes the fat cell's membrane to crystallize, becoming brittle, and rupturing. Once this occurs, the fat cells die and process out of the body as a form of waste.

[Related Article: Learn more about fat freezing >>](#)

#### HOW DOES COOLSCULPTING TECHNOLOGY WORK

CoolSculpting technology was first discovered by two Harvard scientists. These men noticed a rare phenomenon in the cheek fat of children who frequently sucked on popsicles. Due to the extremely cold temperature of the popsicle, these children had less cheek fat.

Using this information, the scientists discovered Cryolipolysis and harvested this technology in the CoolSculpting machine. During treatments, the applicators administer the calibrated cold temperatures and target specific areas on the male body. For example, the cold temperature penetrates deep below the skin, targeting stubborn fat cells.

CoolSculpting treatments for men make it possible to "freeze" a portion of fat cells in common problem zones like their chest, abdomen, thighs, and back. Once the fat cells freeze, their cell membrane ruptures, and the cell dies. Weeks after your treatment, the body initiates an immune response. Your body gathers the disabled cells and removes them from the body as a form of waste.

Men love CoolSculpting before it provides a way to reduce diet and exercise-resistant fat without ever having to take time off for surgery.

#### COOLSCULPTING FOR MEN BEFORE AND AFTERS

CoolSculpting for men before and after pictures show real male clients who achieve phenomenal physical transformations after their treatments. Individual experiences may vary. However, each male achieves a noticeable fat reduction in problem areas like the chest after being treated by a reputable professional. CoolSculpting is a technique-sensitive treatment. The more experience the provider has, the better the fat reduction results.

#### WHY THE SURGE OF COOLSCULPTING FOR MEN?

While both men and women utilize CoolSculpting treatments to target and reduce diet and exercise-resistant fat, typically, men and women differ in their reasonings. When women get fat frozen, many hope to increase their confidence by improving their body's appearance. CoolSculpting for men, on the other hand, is often scheduled because male clients believe a slimmer, sculpted body offers many competitive advantages in the workplace and helps them be more attractive when dating.

An article in Bloomberg magazine reports that this popular non-invasive cosmetic procedure is "becoming viewed by men as a method of self-enhancement. *like eating well, wearing nice clothes, or going to the gym.*"

#### HOW COOLSCULPTING IMPROVES MALE PHYSIQUES

CoolSculpting for men treatments improve male physiques by targeting some of the most common problem areas. These include Pseudo Gynecomastia or man boobs, love handles, stomach, thighs, and back.

#### WHAT IS PSEUDO GYNECOMASTIA?

Pseudogynecomastia is a male condition where the breast or chest area has excessive adipose (fat) tissue behind, around, or under the nipples. This is a genuine problem that many men struggle with daily. Luckily, CoolSculpting can help, but only if you have Pseudo Gynecomastia and not Gynecomastia.

#### GYNECOMASTIA VS PSEUDO GYNECOMASTIA

Understanding the difference between Gynecomastia and Pseudo Gynecomastia helps determine if CoolSculpting can help your problem. The main difference between these two conditions is the type of tissue in the breasts, causing them to be enlarged or look feminine. In Gynecomastia, the male chest has excess glandular tissue (possibly some excess fat tissue). The glandular tissue is firmer and more fibrous than regular, fatty tissue. It also does not respond to diet or exercise. Gynecomastia typically occurs when there is an imbalance in hormone levels. If you are unsure what is causing your boobs or man boobs, consult your physician and determine if CoolSculpting for men is an option for your chest.

#### HOW COOLSCULPTING FOR MEN TARGETS MOOBS OR MAN BOOBS

CoolSculpting's ability to improve pseudogynecomastia, the medical term for boobs, is supported in several clinical studies. One of the more recent studies in the *Journal of Dermatological Surgery*. The paper, titled "Cryolipolysis for Targeted Fat Reduction and Improved Appearance of the Enlarged Male Breast" found that 95% of men participating in the study saw visible reductions in fat and improvements in the overall appearance of "breasts," after only two CoolSculpting treatments. This led researchers to conclude that *CoolSculpting provides "a safe, effective, and well-tolerated non-surgical treatment of pseudogynecomastia."*

CoolSculpting on men's chests allows the technician to target the chest area, reducing a portion of fat cells in this specific area. Unfortunately, since the ability to "spot reduce" fat is a myth, it is hard for men to burn off fat in a particular area—including the chest. Now cool sculpting the chest allows men to target chest fat and sculpt a more firm, attractive male physique to show off.

#### COOLSCULPTING BURNS OFF STUBBORN BELLY BULGES

Another area on the body men struggle with is the stomach. Much like women, some men are genetically more apt to store stubborn fat in their stomach area. No matter how much dieting or exercising they do, they just cant seem to lose that lower belly pooch.

CoolSculpting for men on the stomach makes it possible to target those fat deposits in the lower stomach, reduce a portion of stubborn fat in that area, and contour a more lean, sculpted midsection. Male CoolSculpting means you can stop spending hours and hours in the gym trying to accomplish that sculpted six pack.

#### COOLSCULPTING MEN'S LOVE HANDLES

That's right, women are not the only ones who worry about their love handles. Love handles are actually a common problem area for men. Like the stomach area, the love handles tend to store stubborn fat easily while resisting diet and exercise efforts.

Now CoolSculpting on the love handles makes it easy to reduce fat cells and contour a more sculpted physique using dual contouring or two CoolSculpting machines at once.

#### COOLSCULPTING RESULTS FOR MEN

CoolSculpting results for men are long-lasting. Unlike traditional weight loss programs or medications that shrink fat cells, Cryolipolysis physically metabolizes fat cells and then excretes them from the body as waste. These cells cannot re-expand once they are removed. And since our bodies stop producing fat cells once we reach adulthood, they can never grow back. They are gone for good. It is important to note that excessive weight gain in surrounding areas could obscure your CoolSculpting results. To ensure you continue enjoying your new lean, sculpted physique, you should continue to diet and exercise.

#### MALE COOLSCULPTING SIDE EFFECTS

CoolSculpting treatments are safe and effective for men. This non-surgical fat reduction procedure is praised for its high safety profile and minimal CoolSculpting risks. One clinical study evaluating the safety of CoolSculpting concludes that, "Cryolipolysis is a safe, well-tolerated, and effective treatment method for reduction of subcutaneous fat." Another study confirms these findings saying, "Cryolipolysis is considered to be both safe and efficient with a high patient satisfaction rate."

CoolSculpting side effects are also unlikely. However, it is common for men to experience regular symptoms associated with a natural immune response after the cooling cycle is complete. These symptoms include tenderness, redness, numbing, or bruising around the treatment area. Typically, the symptoms go away on their own within days to weeks.

#### HOW MUCH DOES MALE COOLSCULPTING COST?

At Concierge Aesthetics & Plastic Surgery, everyone should be able to afford body contouring. This is why we offer CoolSculpting in Chicago at one of the most affordable rates in the area. The CoolSculpting treatment differs for everyone, so your price will vary. During your consultation with Concierge Aesthetics & Plastic Surgery, you can discuss your body contouring goals and receive a treatment plan cost that fits your budget.
