CoolSculpting Near Me: Finding the Best CoolSculpting Utah Provider

Searching "CoolSculpting near me" on Google garners numerous results listing providers in your area. However, CoolSculpting is a technique sensitive procedure and not all providers are created equal. Therefore, to ensure you have a safe procedure and better protect your investment, it is important to choose the provider that is best suited to provide the most optimal CoolSculpting results possible. However, with more and more doctors and medical spas offering this fat freezing procedure, finding an experienced and reputable provider can be challenging. With your many options, how are you to know which one is right for you? Follow these insider tips to find the best provider for CoolSculpting near me.

Finding CoolSculpting Providers in Salt Lake City and Lehi, UT

Searching "CoolSculpting near me" is one way to find providers in Salt Lake City or Utah county. You can also see a list of providers by going to "find a provider" on the official CoolSculpting website and searching your zip code. The results are sorted, starting with the best-selling provider first. This is a good indication of a provider's experience and can help you in finding the best "CoolSculpting near me."

Shopping by Price when Searching "CoolSculpting Near Me"

CoolSculpting cost is an important consideration for most individuals searching for CoolSculpting near me. However, CoolSculpting prices should be only one consideration when choosing a provider. Besides, considering that the manufacturer of the machine sets prices, CoolSculpting cost is relatively the same, regardless of where you freeze your fat.

For the Best Results, Find the Best Provider

Like any other cosmetic treatment, the person performing the fat freezing procedure greatly affects the patient's experience and results. When sorting through the Google results after searching "CoolSculpting near me" look for client testimonials, check out Google reviews, and see if the provider has [CoolSculpting before and after pictures of actual patients](#) (many medspas use stock photos depicting patients from other doctors, and therefore do not demonstrate the provider's skill or experience.) Ask how long the provider has been performing fat freezing procedures, and inquire about the experience and training of the person performing the treatment. Ultimately, schedule a complimentary consultation. Choose a provider that will give you an honest opinion about your candidacy for the procedure. Not all people are suited for CoolSculpting. Providers know this. Only patients who are [good candidates](#) can expect optimal results. So ask your provider how often they advise their clients NOT to get CoolSculpting. If they advise some people against the fat freezing procedure, it is a good indication that the provider prioritizes patient well-being and satisfaction above profit.

How Long Does CoolSculpting Last? Is CoolSculpting Permanent?

Before undergoing a fat freezing treatment, most patients want to know how long does CoolSculpting last? Considering that [CoolSculpting prices](#) require a substantial investment for some people, it is understandable that consumers want assurance about the longevity of [CoolSculpting results](#). No one wants to fork out money to reduce stubborn bulges if there is a chance that they will gain back the fat.

How Does CoolSculpting Work?

Before addressing the longevity of CoolSculpting results, it is helpful to know how CoolSculpting works to reduce stubborn bulges. [Unlike weight loss treatments](#) that shrink fat cells (preserving their potential to expand again if the person gains weight back) CoolSculpting destroys fat cells and eliminates them from the body.

[Learn more about how CoolSculpting works >>](#)

Does Fat Cells Grow Back After CoolSculpting?

Once you reach adulthood, your body does not create any more fat cells. If you gain weight, the body will store that fat in existing fat cells, which expand to accommodate the additional fat. With fat reduction treatments, like [CoolSculpting or Liposuction](#), fat cells are actually removed from the body to reduce [stubborn bulges](#). Since the body does not create more fat cells, the fat cells that are removed cannot grow back. Once fat cells are excreted from the body, they are gone for good. This leads to a long-term reduction in fat.

How Long Does CoolSculpting Last?

Longitudinal studies have set out to scientifically determine how long does CoolSculpting last. In 2016, the *Journal of Cosmetic Dermatology* published "Long-term efficacy follow-up on two cryolipolysis case studies: 6 and 9 years post-treatment." The longitudinal study followed CoolSculpting patients who received a single treatment, to their left flank (love handle) 9 years earlier. The right flank was left untreated, providing a control for "fluctuations in weight." The researchers found that "despite weight changes over the years, the treated left flank showed a persistent reduction in size and a change in contour." They concluded, "Local reductions in flank fat have significant longevity in these subjects and suggest that results from cryolipolysis may be very long-lasting."

So how long does CoolSculpting last? Science shows that fat freezing results can last indefinitely.
