SculpSure before and after Photos: Real Patient Results

SculpSure before and after pictures reveal why this non-invasive body contouring treatment is a popular option for reducing stubborn bulges without surgery or downtime. Also known as "Laser Lipo," SculpSure melts away stubborn fat cells that make up notorious problem areas, such as belly fat, love handles, double chins, and more. Treatments take as little as 25 minutes and patients may return to their normal activities immediately. Results appear gradually and remain permanent.*

Check out the SculpSure before and after slide show below to see real patient results and continue reading to learn more about this exciting, non-surgical alternative to Liposuction.

 Before & After 12 Weeks, 2 Treatments, Flanks and Abdomen
 Courtesy of S. Doherty, MD

SculpSure before and after images reveal the impressive transformation that can be obtained with non-invasive laser lipo. With any cosmetic procedure, results may vary.* However, these before and after pictures depict real patients and demonstrate the dramatic and natural looking fat reduction that results when patients choose a skilled and experienced practitioner, such as those at [New Beauty & Wellness](#) to perform their SculpSure treatment.*

The Benefits of SculpSure

- Target stubborn fat.
- Reduce bulges that resist diet & exercise
- Non-invasive and no downtime
- A non-surgical alternative to liposuction
- Great for both women and men
- FDA cleared as safe and effective
- Scientifically proven
- Painless and safe on all skin types
- Fast, 25 minute treatments
- Natural looking results
- Long term fat reduction in treatment areas

SculpSure treatment areas

As demonstrated by the before and after images, SculpSure can reduce fat from numerous problem areas. Currently, SculpSure is cleared by the FDA to address the following fat deposits: Belly fat (abdomen fat), love handles (the flank area,) back fat, thigh fat (both on the inner and outer thigh,) and submental fat (double chins and neck fat.)

How Does SculpSure Work?

SculpSure utilizes a specially calibrated laser that safely penetrates the skin to heat underlying fat cells. The thermal energy damages the fat cells, triggering lipolysis (fat cell death.) Over a span of several weeks, the immune system collects the destroyed fat cells and processes them out the body as waste. Once excreted, the fat cells do not grow back, leading to long-term results.

Get Some SculpSure Before and After Pics of Your Own

If you think non-invasive laser lipo is right for you and you want some SculpSure before and after images of your own, get started by scheduling a complimentary consultation with the leading SculpSure provider in Westport, CT, [New Beauty & Wellness](#).
