### Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

- CONTRAST**
- Background and foreground colors do not have a sufficient contrast ratio.**
- These are opportunities to improve the legibility of your content.

- NAVIGATION**
- [1d] attributes on active, focusable elements are not unique**
  - Heading elements are not in a sequentially-descending order**
- These are opportunities to improve keyboard navigation in your application.

- NAMES AND LABELS**
- Links do not have a discernible name**
- These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.
