### What Is Glacial Rx™?

Glacial Rx™ is the first FDA-cleared dermatologic treatment that uses Cryomodulation™ for the removal of benign lesions of the skin, like age spots.

### What Skin Concerns can Glacial RX Treat?

Age spots, also known as sunspots, liver spots, and solar lentigines, are flat spots on the skin that are tan, brown, or black in color. While these benign lesions are common, their appearance can also be bothersome, to say the least.

Glacial Rx™ is the age spot removal treatment you didn't see coming, but are ecstatic is here.

### Glacial RX Benefits

- Glacial Rx is FDA-cleared to remove benign lesions like age spots (also known as sunspots, liver spots, or solar lentigines) anywhere on the body.
- Most people see results in less than a month, sometimes even within days. In clinical trials, 93% of treated age spots lightened within two months.
- The treatment is comfortable and requires no anesthesia. Its cooling feature temporarily reduces pain, swelling, and inflammation.
- There's minimal to no downtime afterward. In clinical trials of more than 600 participants, minor side effects—redness and microcrusting—resolved on their own in a few days.

## Why Choose Hawaii Aesthetics?

### David Yew MD

Dr. Yew has trademarked "SculptraFill" as an original and innovative technique that is requested worldwide (Dubai, Sydney, Seoul, Taipei, NYC, LA, Las Vegas). He has a unique and artistic approach in combining Botox, injectable fillers, Sculptra, Kybella & PDO Threads to create a natural, youthful appearance.

All injections are performed by specialists who have been trained in minimally invasive non-surgical injectables. As a result—our treatment results are consistently superior and each treatment is tailored toward the individual's expectations and skin type.
