COOLSCULPTING ELITE

FAT FREEZING TREATMENTS IN RANCHO CUCAMONGA, REDLANDS, AND HESPERIA, CA

CoolSculpting has been the #1 fat-freezing treatment since its release in 2012. Now, the makers of the original CoolSculpting are introducing CoolSculpting Elite! This new treatment uses the same cooling technology, introducing a new machine, ergonomically C-shaped applicators, and dual contouring capabilities. It's true. The new CoolSculpting Elite makes fat freezing more comfortable and effective with TWICE the amount of fat cells frozen in LESS treatment time.

If you want to learn more about the newest way to freeze your fat cells, contour sleek curves, and achieve the body of your dreams, call Health First Medical Weight Loss and Skin Care now. We are proud to be the primary provider of CoolSculpting Elite in the San Bernardino area with 3 locations including Hesperia, Redlands, and Rancho Cucamonga. Call us at our Hesperia facility at (760) 437-6049, our Redlands facility at (909) 378-9075, or our brand-new state-of-the-art facility in Rancho Cucamonga, CA, at (909) 870-9040.

COOLSCULPTING BENEFITS

- ✔ Reduces twice the amount of fat cells in less time
- ✔ Contours attractive body curves
- ✔ New C-shaped applicators
- ✔ Dual contouring
- ✔ FDA-cleared
- ✔ Safe and effective
- ✔ Natural-looking, lasting results

COOLSCULPTING ELITE BEFORE AND AFTER*

CoolSculpting Elite before and after images show how this new treatment helps patients achieve transformative fat reduction. As with any cosmetic treatment, results may vary.* However, the CoolSculpting Elite before and after pictures show what is possible with this new treatment. Each patient achieves noticeable fat reduction on a higher caliber than those of the original CoolSculpting treatment.

THE ORIGINAL COOLSCULPTING VS COOLSCULPTING ELITE

CoolSculpting, the revolutionary body contouring treatment, hit the industry back in 2010. At the time, it was the only FDA-cleared treatment to reduce fat using the advanced cooling technology known as Cryolipolysis.

The original CoolSculpting machine targets a stubborn bulge with one applicator, isolating a persistent bulge of fat. This applicator subjects the bulge to calibrated cold temperatures that effectively freeze the fat cells underneath without harming overlying skin or tissue.

Afterward, the body's immune system naturally gathers and disposes of the dead cells via the lymphatic system. Once fat cells are gone, they can never re-grow. CoolSculpting provides patients with natural-looking, long-lasting fat reduction results.

NEW & IMPROVED COOLSCULPTING ELITE

CoolSculpting Elite improves upon the popular fat reduction procedure with re-engineered applicators, larger cooling panels, and the capacity to use two applicators simultaneously.

NINE TREATMENT AREAS

The nine treatment areas include:

- ✔ abdomen (a.k.a. "belly fat")
- ✔ flanks (a.k.a. "love handles")
- ✔ thighs (inner and outer thigh fat)
- ✔ upper arms
- ✔ armpit area (a.k.a. "bra bulge")
- ✔ below the buttocks (a.k.a. "banana roll")
- ✔ back
- ✔ chin
- ✔ jawline area (for neck fat and a double chin)

RE-DESIGNED APPLICATORS

The CoolSculpting Elite applicators feature several engineering improvements. The improvements include a new C-shape design. The re-designed applicator helps conform to the natural curves of the patient's physique for a more ergonomic fit.

LARGER COOLING PANELS

The new applicator features 18% larger cooling panels. These eliminate more fat cells than the older applicators.

DUAL APPLICATOR CAPABILITY

The most significant difference between CoolSculpting Elite and the original machine is the introduction of dual applicator capability. The original device only targets one area of the body, using one applicator at a time.

In comparison, the new Elite machine comes with two applicators. This permits patients to treat two areas during one treatment. Dual applicators double the results in half the time.

COOLSCULPTING VS LIPO

Before introducing non-invasive, nonsurgical body contouring, people had to undergo invasive surgeries to reduce fat cells. While liposuction is a popular and effective fat-reduction treatment, it is a serious procedure with several drawbacks, including incisions, anesthesia, and a long, complicated recovery. Now, thanks to innovative cooling technology, people can reduce fat cells in a comfortable 30-minute process known as CoolSculpting.

CoolSculpting is the best nonsurgical way to reduce fat cells using cooling technology. Treatments are short and comfortable. Best of all, they involve no incisions, sutures, anesthesia, or a complicated recovery. In fact, CoolSculpting has minimal downtime. This means you don't miss a beat after your cooling cycles. As a result, you can enjoy fat reduction and resume your daily activities.

FINDING THE BEST COOLSCULPTING ELITE PROVIDER

CoolSculpting Elite is a technique-sensitive treatment. The more knowledgeable and skilled the treatment specialists, the more phenomenal the results. Since CoolSculpting Elite is a unique body sculpting treatment, it is essential to research and find the most reputable provider. Health First Medical Weight Loss and Skin Care is one of the leading facilities in the area that offer this body sculpting treatment. We have an entire staff of exceptional specialists who know how to use CoolSculpting Elite to help each patient achieve fat reduction that is unparalleled.

In addition, Health First Medical Weight Loss and Skin Care provides optimal CoolSculpting services tailored to fit each patient's needs. When patients first visit our facility for inquiry about treatments, they will meet with one of our personable and knowledgeable staff members. We will devise and discuss the fully customized treatment plan created specifically with their body in mind during the visit.

COOLSCULPTING SIDE EFFECTS AND RISKS*

CoolSculpting is a safe, FDA-cleared treatment. It is non-invasive, with minimal discomfort and downtime. The risk of adverse events is low. After the fat-freezing treatment, the immune system takes over, collecting and disposing of destroyed fat cells. This immune response may cause redness, bruising, tenderness, and swelling in the treatment area. These side effects are typically mild. They dissipate on their own within a week or two after the procedure. As always, experiences will differ per person.*

COOLSCULPTING ELITE CANDIDACY

You might wonder if CoolSculpting Elite is right for you. Sadly, CoolSculpting Elite will not be a good fit for everyone. An ideal CoolSculpting Elite candidate is a healthy adult experiencing stubborn bulges they cannot reduce with diet or exercise. Only ideal candidates can expect to experience optimal fat freezing results. If you question your candidacy, it is best to speak with a licensed CoolSculpting provider. Learn if CoolSculpting Elite is right for you by speaking to a fat-freezing specialist at Health First Medical Weight Loss and Skin Care, located in Hesperia and Redlands, CA and now Rancho Cucamonga, CA. During a complimentary consultation with our team of experts, a specialist will evaluate your body and let you know what CoolSculpting can do for you. You will also be able to ask questions, learn more about cryolipolysis, and get pricing information.

WHY CHOOSE HEALTH FIRST MEDICAL WEIGHT LOSS AND SKIN CARE

Health First Medical Weight Loss and Skin Care is the only certified CoolSculpting practice in High Desert. Our leading practitioner, Dr. Leonard Schulkind, has over 24 years of experience. We are dedicated to helping you look and feel better than ever, and we have an extensive menu of medical aesthetics and weight loss services in order to help you reach your goal. Book with us today to start your fat-freezing journey.

HOW TO USE COOLSCULPTING FOR ARMPIT FAT REMOVAL WITHOUT SURGERY

June 16, 2023

While resistant pockets of fat develop nearly anywhere on the body, one of the most common trouble areas are the armpits. Underarm fat and pockets in the armpit area are especially challenging to slim and tone. For some, no matter how much you diet or exercise, these stubborn bulges just won't go away.

BUT WHY ARE THEY THERE IN THE FIRST PLACE?

WHAT CAUSES ARMPIT FAT?

Nearly every adult struggles with some form of unwanted fat on their body. And there are many reasons, which is part of what makes it so difficult to control.

Some of the most common causes of armpit fat include:

- Poorly-fit clothing** – A simple yet frequent occurrence of fat bulges from the armpit area is from wearing shirts or bras that are too tight. Not giving yourself enough room will force that excess fat into a pouch.
- Genetic factors** – Genetics play a massive role in the way your body distributes and stores fat. If your family members also deal with it, that could be why you do as well.
- Weight gain** – This goes hand in hand with genetics, since gaining weight leads to subcutaneous fat deposits that can form under the arms.
- Hormonal changes** – Anything from puberty to menstruation, pregnancy, and menopause can impact breast tissue. This includes making the area between the breasts and the underarm appear larger.
In most cases, armpit fat is more of an annoyance or hindrance than a source of medical concern. However, axillary breast is a condition where breast tissue develops outside of the proper area, and it can make it appear as though you have more armpit fat than you do.

While axillary breast is not very common, swollen lymph nodes are also a possibility, which is why you should seek a doctor's opinion if you notice a lump or abnormal swelling in your armpit. But if you're mainly concerned about your current appearance, the professionals at Health First can help.

ARMPIT FAT SURGERY VS. COOLSCULPTING ARMPIT FAT

When it comes to deciding which treatment option is going to be best for you, it's a matter of your overall goals. Plastic surgeons and medical spa professionals have effective techniques for eliminating unwanted fat and sculpting the body. Two of the most common and popular solutions are CoolSculpting and Liposuction.

LIPOSUCTION FOR ARMPIT FAT

Liposuction is invasive, where a provider will use a tiny incision to suction fat and contour the body. It can be used nearly anywhere to target even the most challenging fat pockets. However, not everyone is looking for such dramatic results, nor are they willing to navigate recovery. Many people struggling with diet-resistant fat are curious about removing armpit fat without surgery.

When armpit fat is simply too difficult to get rid of on your own, but you're not looking to undergo invasive surgery, the solution is CoolSculpting. Even better? CoolSculpting Elite is the best fat-freezing treatment to permanently remove unwanted fat.

COOLSCULPTING FOR ARMPIT FAT

CoolSculpting Elite is the armpit fat removal solution that doesn't involve anesthesia, scars, and downtime but still achieves body contouring results. It is the newest fat reduction method capable of freezing fat cells with Cryolipolysis.

CoolSculpting Elite improves upon the original, well-known, CoolSculpting machine in many ways. The new machine comes with re-engineered applicators. It reduces twice the amount of fat cells in less time with the C-shaped applicators and larger cooling panels.

Thanks to these advancements, patients treating the armpits can enjoy more convenient cooling sessions, more comfortable treatments, and more impressive fat reduction.

HOW COOLSCULPTING ARMPIT FAT WORKS

CoolSculpting eliminates armpit fat without surgical methods. Treatments use Cryolipolysis to target and freeze the stubborn armpit fat cells below the skin.

During a cooling session, a technician places one of the new C-shaped applicators over the armpit area. Once the machine is activated, the skin is gently drawn up into the applicator, where it is exposed to calibrated cooling.

Because fat cells are not hardy like skin cells, the temperature causes their membrane to crystallize and rupture. When this occurs, the cell dies and eventually leaves the body as a form of waste through the lymphatic system.

HOW MUCH DOES REMOVING ARMPIT FAT WITH COOLSCULPTING COST?

Since armpit fat is challenging to lose, many people consider cosmetic treatments for help. Thankfully, there is a non-invasive way for these countless individuals to reduce armpit fat and sculpt a leaner, sexier physique.

If you are considering CoolSculpting for armpit fat removal, you are likely wondering about the price. However, it's important to know that fat-freezing techniques are not one-size-fits-all solutions. Each treatment plan is customized for the individual patient's body and goals.

Scheduling a free consultation with Health First Medical Weight Loss and Skin Care is an excellent way to receive a tailored treatment cost. During your visit, your body is evaluated by a skilled technician. If CoolSculpting Elite is the right treatment for eliminating your armpit fat, we will develop a plan that fits your needs and budget.

COOLSCULPTING ELITE BEFORE AND AFTERS FOR YOUR STOMACH, THIGHS, ARMS & MORE

Considering using the technology of CoolSculpting to shed extra fat from specific areas of your body? Of the many options available for body contouring, CoolSculpting is consistently a top favorite. And now that [CoolSculpting Elite delivers twice the slimming results with less time](#), it's no wonder you're curious.

One of the best ways to help you in your decision-making process for any treatment is by seeing results from someone who has already done it.

So we gathered progress images showing you before and after CoolSculpting in the most popular areas. **There are nine treatment areas that CoolSculpting Elite's applicator upgrades can target, including:**

- Abdomen
- Flanks
- Upper arms
- Knee fat
- Back fat
- Thighs (inner and outer)
- Arm pit area (bra bulge)
- Below the buttocks (banana roll)
- Submental region (double chin, turkey neck, and jowls)

CoolSculpting Elite is the latest advancement in fat freezing. The treatment has a new machine, re-engineered applicators, larger cooling panels, and the ability for dual sculpting.

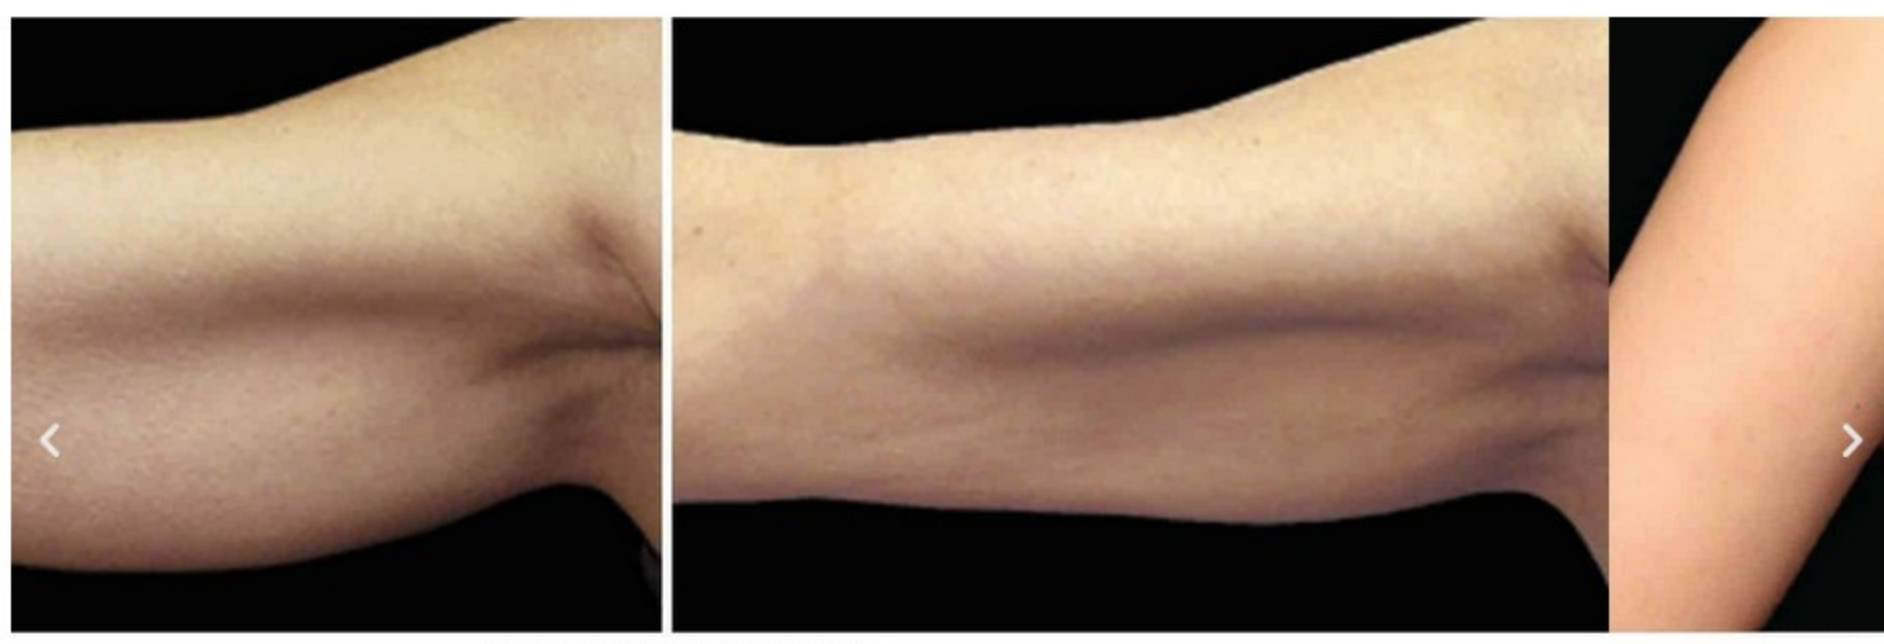

HOW COOLSCULPTING WORKS

To fully appreciate the impressive CoolSculpting Elite before and after pictures, it helps to understand the treatment process. CoolSculpting uses an advanced cooling technology, Cryolipolysis, to target fat cells below the skin.

This process exposes subcutaneous fat cells to a calibrated cooling responsible for freezing a portion of the excess cells without injuring the skin or surrounding tissues. When the fat cells are frozen, they crystallize and become brittle. Their cell membrane ruptures, triggering apoptosis or cell death. After treatment, the lymphatic system metabolizes the dead fat cells and processes them out of the body as a form of waste.

Let's see what patients experience with CoolSculpting Elite before and after pictures.

COOLSCULPTING ARMS BEFORE AND AFTER*

COOLSCULPTING ARMS

It's normal for healthy individuals to have some extra body fat. The challenge comes when excess fat begins to appear and bulge in certain areas because of how frustrating it can be. When it comes to the upper arms, developing "bat wings" might not be favorable.

Freezing arm fat is one of the quickest and most effective ways to slim your upper arms. CoolSculpting is primarily known for its high safety profile. Not only does it have FDA clearance and countless scientific studies to back its safety and efficacy. But CoolSculpting also has over 500 treatments done daily around the globe successfully.

COOLSCULPTING STOMACH BEFORE AND AFTER*

COOLSCULPTING STOMACH

Many of us know what it's like to want a flat stomach but have a hard time achieving and maintaining it. The stomach is such a common place for fat to store, so if you have three inches or more of pinchable fat on your belly, you could be a great CoolSculpting candidate. **Helping your body eliminate some of the excess fat cells and tissue around the abs will lead to a slimmer figure.**

COOLSCULPTING THIGHS BEFORE AND AFTER*

COOLSCULPTING INNER AND OUTER THIGHS

Feeling like your thighs are too large for the rest of your body can be tough on self-confidence. From pants not sitting right to feeling uncomfortable walking around on hot days, thick thighs are not always preferable.

With CoolSculpting Elite's advanced applicators, you can target and slim both thighs at once. Whether you have saddle bags to remove or you're hoping for more of a thigh gap, CoolSculpting works well.

COOLSCULPTING NECK BEFORE AND AFTER*

*CoolSculpting Elite before and after images are an excellent resource for prospective patients. The images show transformative results possible with the new fat-freezing treatment, which can reduce twice the amount of fat in less time.

As with any cosmetic procedure, results will vary. However, when administered by a reputable professional, CoolSculpting Elite yields an impressive, noticeable fat reduction in the target area.

COOLSCULPTING NECK

A double chin is also known as submental fullness, and it's not always due to lifestyle decisions. Many times, it happens with age, or due to hormonal changes.

Neck fat and double chins are so common and so difficult to deal with. If you've been trying everything under the sun but nothing at home is working, it might be time to put technology to the test. **In quick, 30-minute sessions, CoolSculpting reduces stubborn bulges of fat that aren't giving you the profile you desire.**

HOW TO GET GREAT COOLSCULPTING RESULTS

For the best CoolSculpting before and after outcomes, consider these two highly influential factors: CoolSculpting results depend on provider skills and individual candidacy.

1. COOLSCULPTING IS A SKILL-DEPENDENT TREATMENT

Like other cosmetic procedures, CoolSculpting results depend on the provider's skill. This means that the specialist conducting the treatment influences your experience and results.

When selecting a provider for CoolSculpting, shop by reputation, not price. Ask about the facility's background and experience in performing the fat-freezing treatment. Select the most qualified, most experienced provider in your area. This will help guarantee stellar before and after results.

2. GREAT COOLSCULPTING RESULTS REQUIRE GOOD CANDIDATES

The fat-freezing procedure is not intended for all people. To get stellar before and after results, it is essential to ensure you are a qualified candidate for CoolSculpting. **CoolSculpting is designed for healthy adults within 30 pounds of their ideal weight, who regularly exercise but still suffer from bulges of isolated fat deposits that resist diet and exercise.**

CoolSculpting is not a weight-loss treatment. It is not ideal for individuals who are significantly overweight.

The most efficient method for establishing your candidacy for CoolSculpting is to book a complimentary consultation with a trustworthy provider.

HOW LONG DOES COOLSCULPTING LAST?

CoolSculpting before and after images show a dramatic fat reduction, and help many people who are curious decide to move forward with fat-freezing. However, many potential patients want to know about the longevity of these results. CoolSculpting results are long-lasting.

Unlike regular weight loss programs that shrink fat cell walls, Cryolipolysis physically metabolizes fat cells and removes them from the body. **These cells can never return or grow back. They can never re-expand. They are gone for good.** While excessive weight gain may obscure CoolSculpting results, if patients continue to live a healthy, active life, their results can be long-term.

COOLSCULPTING RISKS AND SIDE EFFECTS

There is a chance that some patients may experience mild redness, tenderness, bruising, or even swelling at the treatment area site. These symptoms are common due to the natural immune response CoolSculpting triggers. If a patient experiences these symptoms, they are mild and will go away on their own.

The best way to avoid any chance of risks or side effects is to select the most reputable professional in your area.

GET RID OF UNWANTED FAT WITH COOLSCULPTING IN RANCHO CUCAMONGA, HESPERIA, AND REDLANDS, CA

CoolSculpting is a technique-dependent treatment. When administered by skilled professionals, CoolSculpting works. That's why so many patients choose Health First Medical Weight Loss & Skin Care. Leading the area in body contouring treatments, our professionals offer an unparalleled experience. We feel proud to serve the communities of Hesperia, Redlands, and Rancho Cucamonga.

Take the first step towards securing your own before and after transformation by scheduling a free consultation today for CoolSculpting Elite.
