The FlexSure applicators provide heating for the purpose of elevating tissue temperature for selected medical conditions such as temporary relief of pain, muscle spasms, and increase in local circulation. Like all medical procedures, not all patients are suitable for the treatment. Talk to your medical provider about the risks and benefits of this procedure. A qualified practitioner is solely responsible for evaluating each subject's suitability to undergo treatment and for informing those being treated about any risks associated with the treatment, pre- and postoperative care, and any other relevant information. Individual results may vary and are not guaranteed.

FlexSure™

THE ULTIMATE  
**BODY  
BOOST**

# WHAT IS FLEXSURE?

Introducing FlexSure.™ The body boost treatment that helps you achieve a more youthful appearance. Designed to curve and conform to your body, it specifically targets even the hardest-to-treat areas.

# HOW DOES IT WORK?

FlexSure is a radiofrequency body treatment that provides deep, even tissue heating. The peel & stick applicator curves and conforms to your body to reach those hard-to-treat areas. Common treatment areas include abdomen, love handles, arms, thighs, and knees, and have been described as a gentle hot stone massage.

## AM I A CANDIDATE?

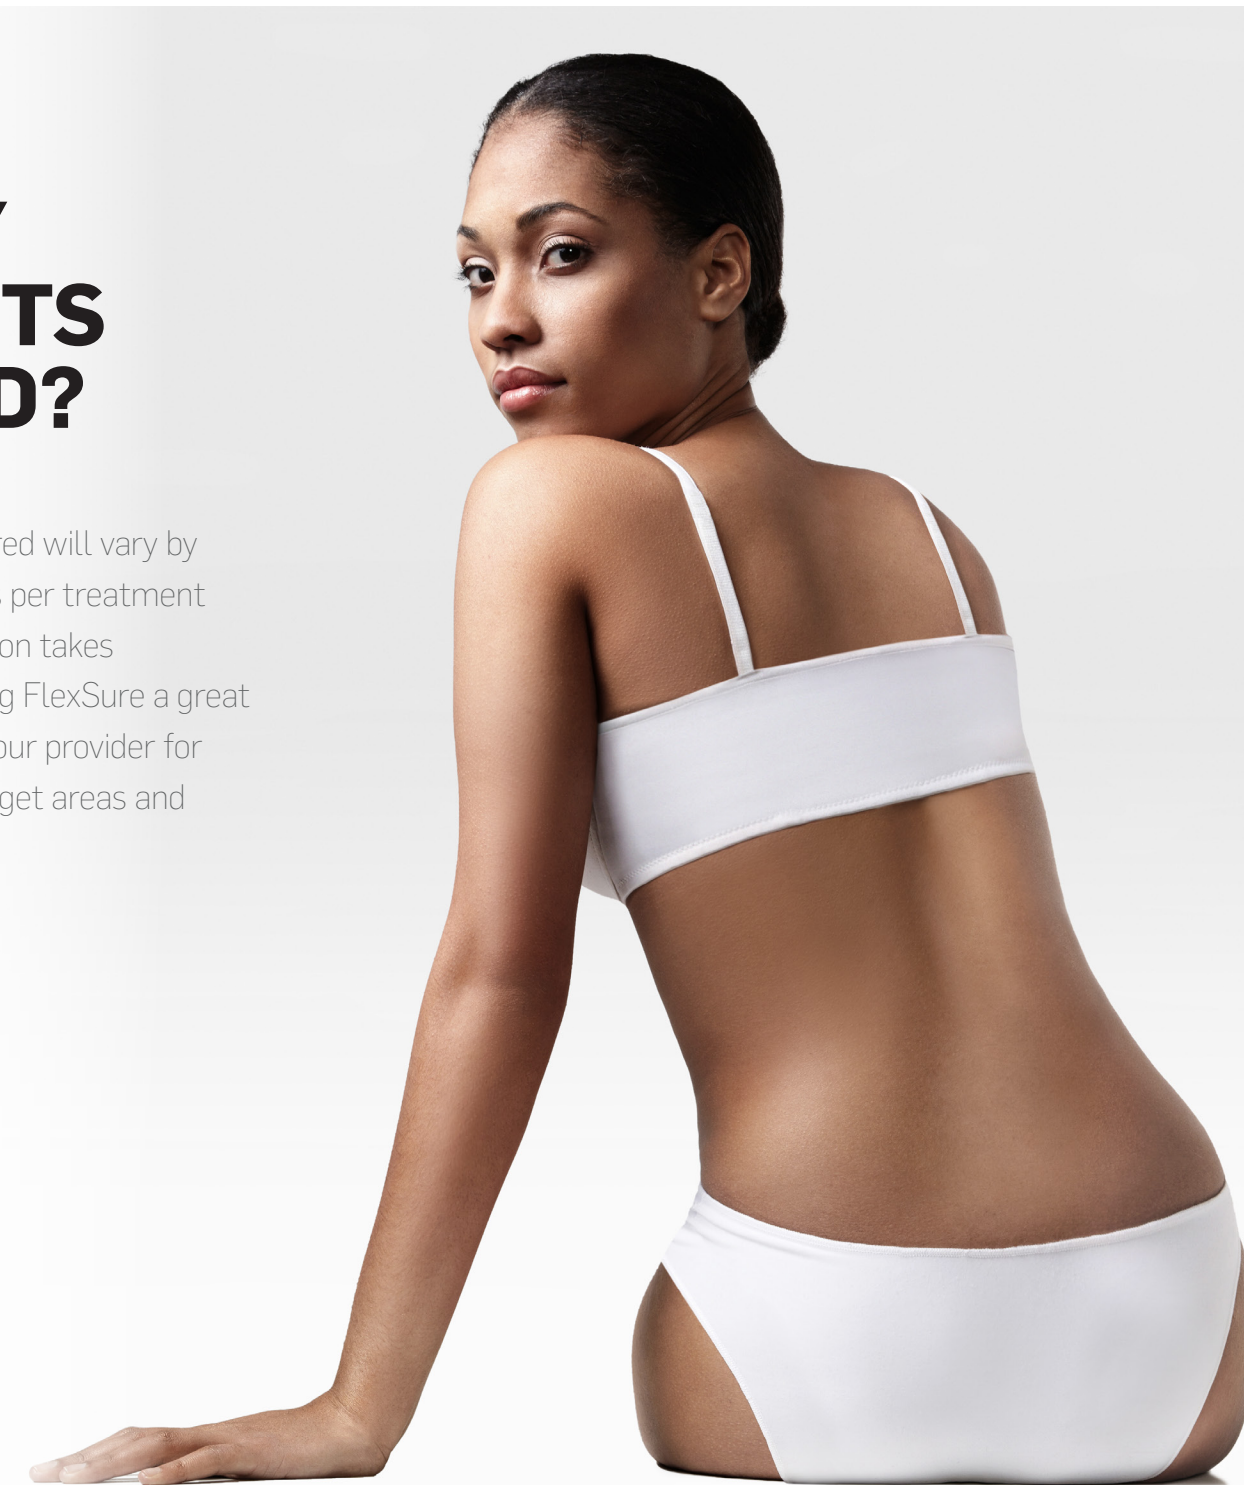

The FlexSure applicator can be used on any skin type, any time of year, with no BMI restrictions. FlexSure has multiple applicator sizes that allow for non-invasive and customized treatments. Since FlexSure requires no downtime, you can return to your daily activities immediately.

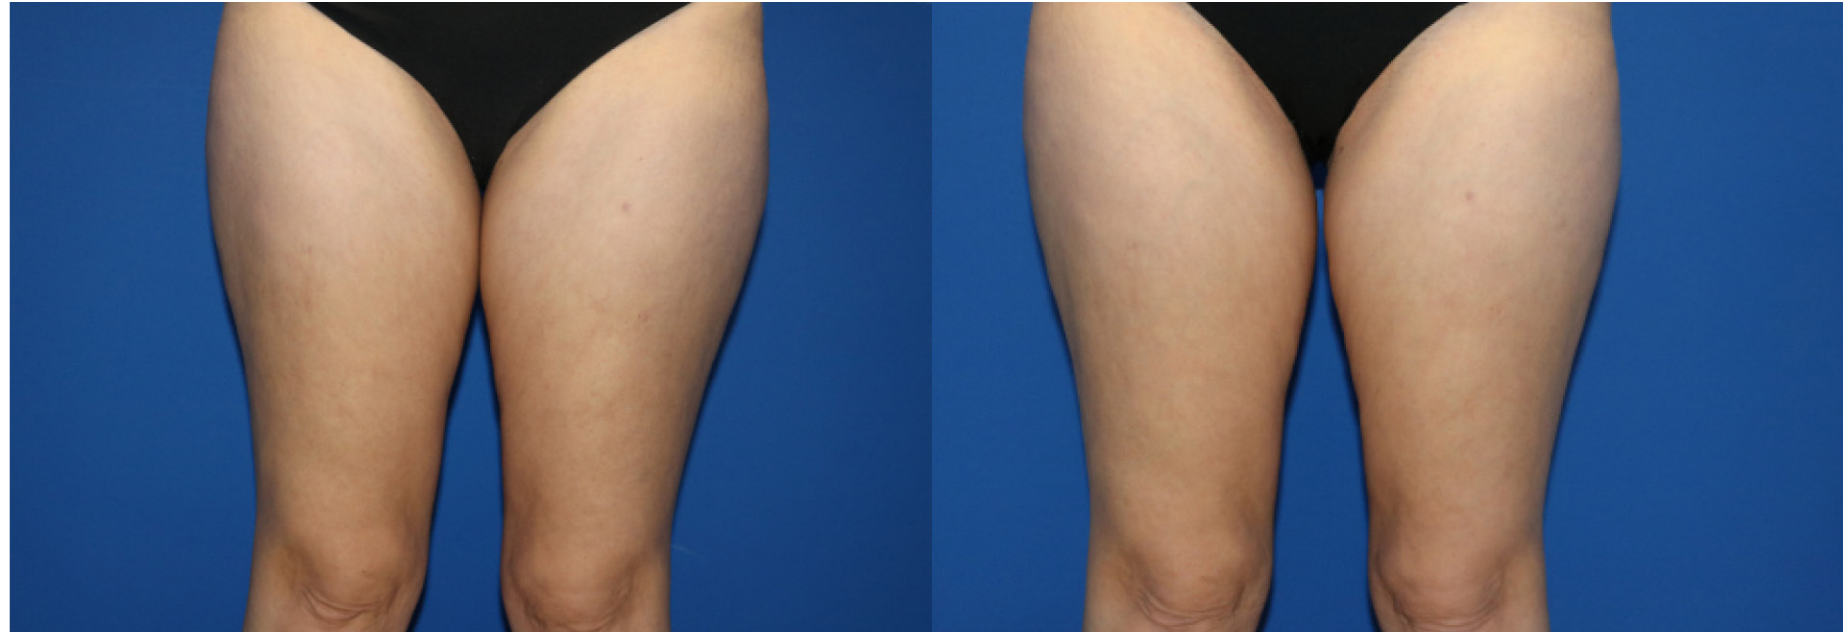

## WHEN WILL I SEE RESULTS?

Results can be seen in as little as 3 treatments, but optimal results are seen after a series of 5 treatments. Speak to your provider for a consultation to discuss treatment areas and number of treatments required.

## HOW MANY TREATMENTS WILL I NEED?

The amount of treatments required will vary by patient. A minimum of 3 sessions per treatment area is recommended. Each session takes approximately 15 minutes, making FlexSure a great lunchtime treatment. Speak to your provider for a consultation to discuss your target areas and number of sessions required.
