## Does CoolSculpting Work? | Fat Freezing Reduces Stubborn Bulges

Does CoolSculpting work? Everyone wants to know when they first learn about the phenomenal results possible with this fat freezing treatment. We are here to answer the questions! Yes, CoolSculpting works! The fat freezing technology of this treatment eliminates fat cells beneath the skin to give you a visibly smoother, firm body.

### How Does CoolSculpting Work?

CoolSculpting works using Cryolipolysis, an advanced freezing technology, to freeze and eliminate stubborn fat cells. The process targets unwanted bulges of fat on notorious problem zones like the belly and exposes them to extreme temperatures. Once the fat cells freeze, they undergo apoptosis, also known as cell death, and then they will process out of the body. After this occurs, the fat cells will never grow back. CoolSculpting offers patients natural, long-lasting fat reduction.

For people who need more proof that this procedure works, you can read real testimonies from CoolSculpting patients and the scientific literature that supports this procedure.

### Does CoolSculpting Work in Clinical Reviews?

CoolSculpting reviews show the scientific studies that accompany this fat freezing treatment and provide clinical evidence of how it is so effective. One CoolSculpting review published in the journal *Clinical, Cosmetic and Investigational Dermatology* found that "Cryolipolysis was shown to reduce subcutaneous fat at the treatment site by up to 25% after one treatment."

Clinical evidence shows how one CoolSculpting session can induce a significant fat cell reduction. In another CoolSculpting study, they found that this treatment offers long-lasting results. According to the *Journal of Cosmetic Dermatology*, "local reductions in flank fat have significant longevity in these subjects and suggest that results from cryolipolysis may be very long-lasting." The findings further prove that the technology used in each treatment provides each patient with significant results that last.

### CoolSculpting Near Me
