HOW DOES JUVÉDERM WORK?

After you see the JuvéDerm before and after results, you will be wondering how you can achieve your own transformative results with this cosmetic treatment. Many people want to know exactly how does JuvéDerm work. JuvéDerm fillers consist of a completely natural substance known as Hyaluronic Acid (HA). Hyaluronic Acid is primarily responsible for keeping moisture locked into your skin to help it look plump and healthy. When you are injected, HA will act as a volumizing substance. Its primary uses are to fill in wrinkles, plump any sunken areas, and add substantial volume to facial features such as lip injections.

HA fillers are not permanent. Over time, the substance will break down and be safely absorbed by your body. The length of your JuvéDerm results will depend on the filler you use.

HOW TO GET THE BEST JUVÉDERM BEFORE AND AFTER RESULTS

Cosmetic fillers like JuvéDerm are skill sensitive. It takes a highly skilled and trained expert to administer the injections in the perfect way to help you achieve the most significant results. The best way to be sure you get your money's worth for your cosmetic treatment is to contact a reputable medical spa like Numa Spa.
