Many ask, "What is CoolSculpting?" This fat reduction treatment helps you achieve a lean, firm body with advanced cooling technology. Scientifically known as Cryolipolysis, this fat freezing technology eliminates fat cells beneath the skin to reveal a firmer, slimmer body. CoolSculpting uses its freezing technology to target fat cells that are resistant to diet and exercise. The treatment is non-invasive and provides you a safe way to reduce fat without undergoing surgery. CoolSculpting

What is CoolSculpting Treatment?

What is CoolSculpting treatments like? Many want to know to expect during treatment before they commit. Each session lasts 35 minutes. Your technician will use a proprietary applicator that isolates the fat cells underneath the skin. Most patients choose to target notorious problem areas that store stubborn fat like the lower abdomen or back.

transformative results

What is CoolSculpting's Outcome?

CoolSculpting side effects are infrequent. Patients report having symptoms of an immune response, like minor swelling or faint redness. The symptoms may occur a few days after treatment but will clear up quickly.

Most report seeing results in as little as four weeks and others report results in 8-12 weeks after treatment.

What is CoolSculpting FDA Cleared to Treat?

Back fat

When it comes to cosmetic treatments, the cost is always a factor to patients. Many believe that treatments like this fat freezing procedure are way out of their price range. The good news is that with discounts and payment options available, freezing fat will fit into almost anyone's budget.

Trilogy Medical thinks everyone deserves to love the body they see in the mirror. That's why we design CoolSculpting treatment plans to fit any budget. The exact cost will vary due to factors such as body shape/size and the target treatment areas. You can schedule a CoolSculpting consultation to discuss the prices and payment options.
