A longitudinal study, measuring the longevity of results are permanent. Following patients on "local reductions in fat have significant long-lasting."*

COOLSCULPTING TREATMENT

Cool Sculpting can provide a total body transformation. With the complete collection of CoolSculpting treatments, you can reduce fat from:

- The abdomen (belly fat)
- The back
- The flanks (love handles)
- The thighs (inner and outer thigh fat)
- The upper arms
- The chest (ideal for men with moobs or gynecomastia)
- The armpit (bra bulge)
- Below the buttocks (banana roll)
- And the submental region (double chin)

WHAT TO EXPECT DURING COOLSCULPTING TREATMENT

In your consultation, our team will first work with you to determine the day of your appointment, your cosmetic goals, and your budget. We will then discuss the treatment options available to you.

COOLSCULPTING: FREEZE AWAY FAT FOR A SLIM, SCULPTED BODY

CoolSculpting is the popular fat freezing procedure that reduces stubborn bulges with surgery or downtime. This revolutionary body contouring solution is the only FDA-approved procedure to utilize controlled cooling to target fat, restrict diet and exercise. Popular treatment areas include belly fat, love handles, double chins, thigh fat and more. Treatments typically take 25 minutes, are painless, and patients may return to their normal activities immediately. Considering all the advantages of CoolSculpting, it's no wonder that millions of men and women have chosen to freeze away their fat as a non-surgical alternative to liposuction.

Freeze away fat and sculpt a body you can feel truly confident about with CoolSculpting. Get started by scheduling a complimentary consultation with the Vein & Laser Institute, a comprehensive medical spa that specializes in body contouring. With three state-of-the-art facilities located in Valparaiso, Crown Point, and Munster, the Vein & Laser Institute is the premier provider of CoolSculpting in Northwest Indiana. Request a consultation online or by calling (219) 736-8118.

BENEFITS OF COOLSCULPTING

- Non-invasive fat reduction treatment
- Non-surgical alternative to liposuction
- Reduce 20% fat in one treatment**
- Eliminate stubborn fat cells for good*
- Sculpt and define contours and muscular definition
- Quick, painless treatments with no downtime
- FDA cleared and clinically proven
- Long-lasting results that look natural!

COOLSCULPTING BEFORE AND AFTER*

CoolSculpting before and after images reveal how freezing away fat can dramatically slim the physique and sculpt attractive contours, all without surgery or downtime. As with any fat reduction treatment, results may vary. However, the individuals depicted in these before and after images are real CoolSculpting patients who underwent actual treatments.**

HOW DOES COOL SCULPTING WORK?

Scientifically known as cryolipolysis, CoolSculpting exploits the fact that fat cells freeze at higher temperatures than other tissue. Using advanced cooling technology, CoolSculpting chills fat cells until they crystallize and die. It does this without harming surrounding skin or tissue. Once fat cells are frozen and die, your immune system naturally processes them out of the body.† This results in long-lasting reduction in fat and a slimmer, more sculpted appearance.†

COOLSCULPTING REVIEWS IN ACADEMIC LITERATURE

Scientists have eagerly evaluated the safety and efficacy of cryolipolysis and published their CoolSculpting review in numerous peer-reviewed journals. One CoolSculpting review found in the journal of *Clinical, Cosmetic and Investigational Dermatology* reported, "Cryolipolysis was shown to reduce subcutaneous fat at the treatment site by up to 25% after one treatment."*

Another CoolSculpting review followed 518 CoolSculpting patients and found "no significant side effects or adverse events were reported."† Moreover, 96% of patients agreed the treatment was tolerable and not painful, and "92% of patients would recommend CoolSculpting to a friend."† The study determined that CoolSculpting "is a safe, well-tolerated, and effective treatment method for reduction of subcutaneous fat."†

A longitudinal study, measuring the longevity of cryolipolysis sought to determine if CoolSculpting results are permanent. Following patients over a new year span, the CoolSculpting review found "fat reductions in fat have significant longevity... (suggesting results from Cryolipolysis may be very long lasting)."†

COOLSCULPTING TREATMENT AREAS

CoolSculpting can provide a total body transformation, reducing fat from nearly anywhere on the body. With the complete collection of CoolSculpting applicators, The Vein & Laser Institute can reduce fat from:

- The abdomen (belly fat)
- The back
- The flanks (love handles)
- The thighs (inner and outer thigh fat)
- The upper arms
- The chest (ideal for men with moobs or man boobs)
- The stomach (belly bulge)
- Below the buttocks (banana roll)
- And the submental region (double chin and neck fat)

WHAT TO EXPECT DURING YOUR COOL SCULPTING TREATMENT

In your consultation, our team will first work with you to confirm your desired treatment area. On the day of your appointment, your cosmetic technician will position the device over that area and apply cooling directly. Once the cooling begins, you will feel a cold sensation with some pressure, but that is about it and these sensations quickly dissipate within a few minutes after the cooling session begins. During your treatment, you can read, check your email, catch-up on Facebook or just close your eyes and rest. How long your CoolSculpting session will last depends on how many areas need to be treated. CoolSculpting is a completely non-invasive treatment, which means you can get back to work and your regular exercise routine right away. While individual experiences may vary, many patients notice results as quickly as three weeks after their procedure, with the best results coming at about the two-month mark.*

IS COOL SCULPTING RIGHT FOR ME?

Do you have bulges in certain areas that you want gone for good? This fat reduction procedure is meant for those people who suffer from unwanted areas of fat that simply will not go away with diet and exercise. Clinically obese individuals should consider other fat reduction solutions. The only way to know if you are a CoolSculpting candidate is through a one-on-one consultation, which you can schedule with the premier CoolSculpting provider in Northwest Indiana by contacting the Vein & Laser Institute online or by calling (219) 736-8118.

COMPREHENSIVE BODY CONTOURING

As the premier provider of both surgical and non-invasive body contouring in Indiana, the Vein & Laser Institute offers a comprehensive solution for attaining the body of your dreams. In addition to CoolSculpting, patients can opt for popular cosmetic surgeries, such as liposuction or a fat transfer, as well as non-invasive skin tightening or a non-surgical tummy tuck using threads. The best way to determine which body contouring treatment is right for you is to schedule a complimentary consultation with the experts at the Vein & Laser Institute.

HOW MUCH DOES COOLSCULPTING COST?

CoolSculpting cost varies per patient, depending on the applicators used, the areas treated, the amount of cooling cycles required for optimal results, and whether CoolSculpting is performed in conjunction with other body contouring treatments, such as skin tightening or liposuction. CoolSculpting prices will be covered in detail during your complimentary consultation, and your treatment plan will be customized to meet your needs and match your budget.

As the premier provider of CoolSculpting in Northwest Indiana, the Vein & Laser Institute provides great ways to save on CoolSculpting cost, including 25% off any treatment area for new clients and treatment bundles for patients who seek a total body transformation by combining two or more body contouring procedures.

CoolSculpting Near Me

For those stubborn weight loss obstacles, it is now possible to reshape your body thanks to a customized CoolSculpting treatment plan tailored to your body, goals and budget. So relax and get ready to bid goodbye to that stubborn fat by calling the Vein & Laser Institute, the leading Indiana CoolSculpting provider, at (219) 736-8118 or reach out online by completing the form below.
