# Bare *it*™

## Discover the FASTEST and MOST EFFECTIVE Hair Removal Method!

One of the advantages of BARE*it* is its versatility. Using a high-powered diode laser with 3 unique wavelengths and the treatment is designed to adapt to your specific hair and skin type for a safe and effective treatment anytime of year.

*As an active woman living in warm states all my life, shaving has been a constant. Having darker, coarse hair I had to address shaving on a daily basis. I am pleased to say that I was completely surprised by the ease of the treatment. My experience was comfortable and quick. After one treatment I started to notice thinner hairs and sparse growth. Can't wait to start the BARE*it* treatment on other areas of my body!*

- Ariel

Typically 4-6 treatments are needed approximately 8-10 weeks apart. Hair grows in three stages so multiple treatments will be needed.

Most people describe the sensation similar to that of a rubber band snapping which immediately resolves once the treatment is over.

2-15 minutes depending on the area of the body being treated.

Fast and easy, there's no downtime so you can get back to enjoying your life.
