Melt That Fat Away

Lose Fat at The Speed of Light!

How would it feel to be able to finally lose all those inches of stubborn fat on your body?

With the "Melt That Fat Away" program, you can lose 3-9 inches in 3 weeks

**No Pain, No Surgery
and No Downtime**

Melt That Fat Away

Lose Fat at The Speed of Light!

Sometimes diet and exercise just aren't enough to achieve the lean, toned body you desire.

If you're tired of struggling with exercise-resistant bra bulges, saddlebags, or post-pregnancy "baby fat," our high tech Body Sculpting Program for inch loss may be your solution!

Melt That Fat Away

Lose Fat at The Speed of Light!

The “Melt That Fat Away” program incorporates advanced LED technology for non-invasive body contouring. Using the power of Light Therapy, our system is the natural and healthy way to lose inches around your waist, hips, thighs and even your arms.

Frequently Asked Questions

WHAT CAN I EXPECT DURING EACH SESSION?

During the treatment, you will be placed lying down on a treatment table. Special red light pads will be positioned in strategic places on your body as you simply enjoy a relaxing 20 minute session.

HOW DOES IT WORK?

The unique light emitted from our device causes the fat cell membranes to temporarily alter the permeability of the cell wall. This brief change allows some of the fat contents to seep out to where it can then be processed by the body. The process also increases collagen and elastin in the skin while creating a slimmer appearance.

WHAT HAPPENS TO THE FAT?

After being released, the fat is broken down into free fatty acids and glycerol and enters the blood stream. Once in the blood stream, the fatty acids can be either used as fuel or quickly eliminated by the body.

Frequently Asked Questions

WHAT HAPPENS TO THE FAT CELLS?

No harm is done to the fat cells. They simply shrink to a fraction of their original size.

WHY DO YOU RECOMMEND A LIVER SUPPORT ?

Your liver is the ultimate filter to remove toxins and nutrient byproducts from the body. The fast release of fat requires a strong liver and therefore a high quality liver support is recommended.

WHAT AREA OF THE BODY CAN BE TREATED?

The treatment can be effectively used on essentially every part of the body where localized fat deposits exist that are resistant to diet and exercise. This includes the waist, hips, upper legs, thighs and upper arms.

HOW SOON WILL I SEE RESULTS?

Results are usually seen after just one treatment.

Frequently Asked Questions

HOW LONG LASTING ARE THE RESULTS?

The results can be very long-lasting. However, this method does not destroy fat cells but releases some of their contents. If your caloric intake is significantly higher than you require, your body will eventually store fat again. For this reason, we recommend a maintenance program of once or twice per month after the desired results are attained.

WHAT RISKS ARE INVOLVED?

There are no risks or side effects involved and it is a safe alternative to invasive procedures such as traditional liposuction or cool-sculpting.

ARE THERE ANY CONTRAINDICATIONS FOR IT'S USE?

Although the treatment is very safe, there are the usual contraindications which include: Pregnancy, Active Cancer, Pacemaker, HIV/AIDS, and Hepatitis C.

Frequently Asked Questions

DO I HAVE TO FOLLOW A DIET?

No changes are required... but you can expect better results if you reduce your caloric intake somewhat and increase your water consumption.

DO I HAVE TO EXERCISE?

Each of your sessions will be followed by 10 minutes of exercise to stimulate circulation and also help burn the fat that has been released.

DOES THIS THERAPY HELP WITH CELLULITE & LOOSE SKIN?

Clients undergoing this therapy have noticed an improvement with cellulite as well as skin tone and texture.

WHAT RESEARCH HAS BEEN DONE?

LipoMelt is based on the over forty years of research starting with NASA experimentation and culminating with the aesthetic and orthopedic industries today. Following the recent discovery that 635nm light has an effect on fat cells, this new technology has created an explosion in the body sculpting industry.

How You Can Help The Process

- Drink 8 to 10 glasses of spring water per day while on program.
- Heavy meals should be avoided before and after each session.
- Limit caffeine on the day of treatment to ensure adequate hydration.
- 10 minutes of exercise is recommended after each session.
- Avoid alcohol during the program
- Try to reduce your overall caloric intake while limiting starchy carbohydrates and simple sugars.

How many sessions are required ?

- Under 5 lbs weight loss = 6 sessions
- 5lbs to 20lbs weight loss = 10 sessions
- 20lbs or more = 20 Sessions
- Sessions are done 2 to 3 times per week until treatment course is completed
- Each session is 20-30 minutes
