Peptides in St. Petersburg, FL

What are peptides?

It is predicted that ALMOST 70% of medicine will be shifting to peptides over the next five years. What is the function of peptides? Peptides are found throughout every cell and tissue in the body and are integral to most biological processes. Maintenance of appropriate concentration and activity levels of peptides is necessary to achieve homeostasis and maintain health.

Peptides, more commonly referred to as small proteins, are selective signaling molecules composed of amino acids chemically linked together by peptide bonds. They range in size from two amino acids or dipeptides to thousands of amino acids or polypeptides. The function of a peptide is determined by its size and amino acid sequence. These sequences are used to communicate between tissues and regulate various processes within the body.

Positive effects of Peptides

Strengthen immune system

Burn fat

Look younger

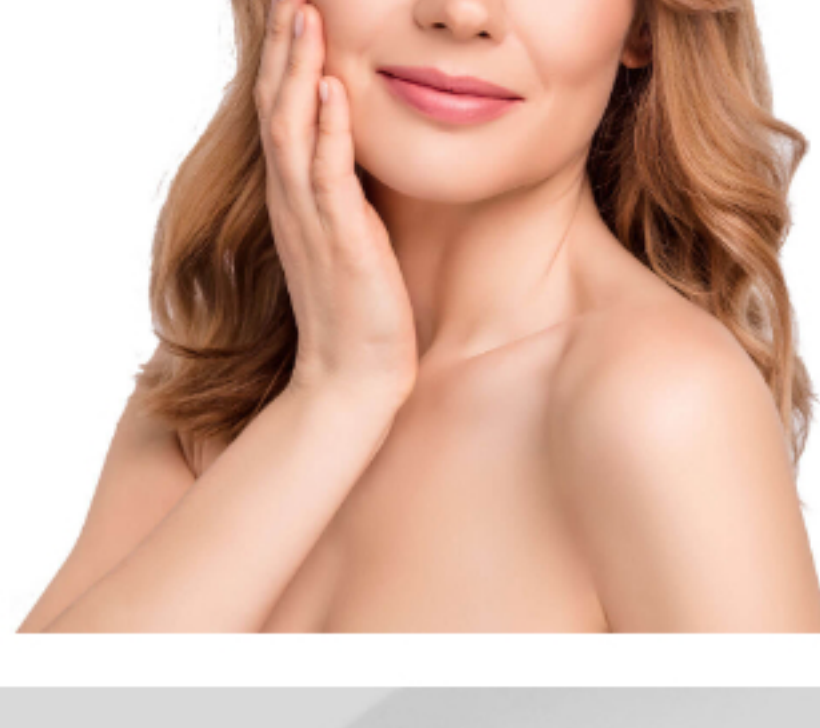

Lose weight

Build muscle

Increase energy

Enhance cognitive function

Improve skin

Stimulate hair growth

Reduce inflammation

Brighten mood

Sharpen memory

Ease sleep

Recover from injury

Improve athletic performance

Heighten libido

The power of Peptide Therapy

Peptides have a wide range of healing abilities based on their specific amino acids. They act as mighty messengers, sending signals to cells and tissues to perform a full spectrum of essential biological functions. Since different peptides affect different cells and functions, they can be specially combined and customized to improve your health and well-being. This is known as peptide therapy, and it's well worth getting to know and look and feel your very best.

Human growth hormone (HGH) is vital for many systems throughout your body. Unfortunately, HGH levels begin to decline after age 30 and only go down from there. This decrease causes your energy, youthful beauty, and fitness levels to plummet, making you look and feel your age. Fortunately, you can replenish your body's youthful levels of human growth hormones with various peptides.

Peptides can be used for multiple things, including Joint and Tendon repair and reducing pain and inflammation. Peptides can also be used for weight loss, hair restoration, decreasing blood sugar levels, and bringing back a youthful appearance to the skin.

Peptide AOD g604

If you have been searching for peptide therapy with all the medical weight loss benefits and none of the side effects, Peptide AOD g604 might be the perfect treatment option for you. It has incredible success not only for weight loss but also for cartilage and joint repair. It is also one of the very few FDA-approved peptides.

What is Peptide AOD g604?

AOD g604 is a GH fragment. A modified form of Growth hormone is a 191 amino acid peptide. Peptide AOD g604 is a modified form of amino acids 176-191 and has been proven to have a strong fat-burning capacity without creating a desire to overeat. It doesn't affect blood sugar or tissue growth. AOD g604 activates degradation and fat-burning oxidation by a method that doesn't use HGH receptors. It has its own mechanism of action independent of HGH. It was originally used as an anti-obesity drug. Once injected, this hormone derivative can stimulate the pituitary gland, which, in turn, speeds up metabolism and burns body fat.

AOD g604 possesses many other regenerative properties associated with growth hormones. Currently, trials are underway to show the application of AOD g604 in osteoarthritis, Hypercholesterolemia, and bone and cartilage repair. AOD g604 has an excellent safety profile, recently obtaining Human GRAS status in the USA. Overall, peptide AOD g604 greatly improves the results of dietary restrictions and exercise.

OTHER BENEFITS OF AODg604

Researchers have also discovered the benefits of AOD g604 aren't limited to fat loss, as it also contains various other regenerative properties that may benefit people with:

- Osteoarthritis
- Osteoporosis
- Hypercholesterolemia
- Worn cartilage
- Depression
- Diabetes
- Bone damage
- Triggers fat release from obese fat cells predominantly more than lean ones
- Mimics the way natural growth hormone regulates fat metabolism
- No adverse effects on blood sugar or growth
- Stimulates lipolysis
- Inhibits lipogenesis - the transformation of non-fatty foods into body fat
- Favorable cartilage repair and regenerative properties, especially when paired with hyaluronic acid and peptides BPC-157
- Helps regulate blood sugar and manage insulin levels.
- Enhances muscle building

HOW DOES AOD g604 PEPTIDE THERAPY WORK?

IS PEPTIDE AOD g604 SAFE?

HOW IS AOD g604 ADMINISTERED?

HOW SHOULD I STORE AOD g604?

WHEN WILL I SEE RESULTS FOR WEIGHT LOSS?

WHEN WILL I SEE RESULTS FOR JOINT PAIN AND INFLAMMATION?

Peptide BPC - 157

Imagine having accelerated recovery times and reduced inflammation, decreased pain, and discomfort when healing from injuries. Oftentimes patients would require prescription medication. Unfortunately, there may be detrimental side effects.

What if that didn't have to be the case? What if there was another way to reduce healing time and feel better without the use of prescription drugs?

Peptide BPC-157 is a compound that can significantly improve healing and recovery time compared with traditional prescriptions on the market.

WHAT ARE THE COMMON USES OF PEPTIDE BPC-157?

Peptide BPC-157 has been shown to accelerate wound healing. It helps with skin burns, improves blood flow, and increases collagen production. This peptide also helps relieve arthritis discomfort and stimulates tissue healing and lean tissue repair. Heals muscle tears and ligament damage and helps regenerate muscle and ligament tissue at a faster-than-average rate. Thus reducing recovery times, decreasing inflammation, and even helping protect the heart.

Relief from discomfort has been observed in people who have:

- Muscle sprains
- Muscle tears
- Ligament damage
- Inflammation
- Other types of muscle injury

HOW DO YOU STORE BPC-157?

ARE THERE ANY SIDE EFFECTS ASSOCIATED WITH BPC-157?

Peptide KPV

What are the uses & benefits of KPV?

- Anti-inflammatory
- Anti-microbial
- Healing wounds & injuries
- Reduces Inflammatory Bowel Diseases (IBD) and colitis
- Some benefits with cancer
- Can strengthen the immune system
- Improve Skin Health

Brief Overview of KPV

KPV is composed of 3 amino acids: Lysine, Proline, and Valine. This peptide is a C-Terminal fragment of the a-MSH protein hormone, which is considered the primary amino acid sequence in the hormone responsible for its properties. KPV is naturally produced in the body. It is found in the hormone alpha-MSH. It is used for inflammation, gut health, and conditions such as inflammatory bowel disease (IBD) and colon cancer. Research in wound healing also reveals that KPV and other alpha-MSH derivatives may offer a host of benefits that speed wound healing, reduce infection, fight inflammation, and lead to better cosmetic results.

HOW DOES KPV WORK AS AN ANTI-INFLAMMATORY AND ANTI-MICROBIAL PEPTIDE?

KPV is an anti-inflammatory peptide that can potentially treat a wide range of inflammatory diseases. Including inflammatory bowel disease (IBS). KPV works by exerting its anti-inflammatory function inside cells, where it inactivates the inflammatory pathway. KPV enters the cell primarily focusing on the cell's nucleus and interacts directly with the inflammatory signaling molecules inside the cell. KPV also has antimicrobial effects against pathogens.

For example, KPV suppresses inflammatory signaling in a lung cell known as the bronchial epithelial cell. KPV can target airway inflammation in lung disease and suppresses both local and systemic immune responses, which commonly cause airway damage and remodeling in inflammatory lung disease.

HOW DOES KPV HELP WITH WOUND HEALING?

HOW IS KPV ADMINISTERED?

WHAT ARE THE SIDE EFFECTS OF KPV?

Minky B.

★★★★★

Though I was nervous about my procedure, management and staff brought a lighter image my way that made my time at Water's Edge remarkable. Nurse Judy is AMAZING! God Bless you all.

Del G.

★★★★★

I have enjoyed my experience with Water's edge medical, they are taking a personal interest in me and helping me get through my neuropathy issue. I still have a ways to go but I'm sure and have confidence they will continue to help me.

Randy N.

★★★★★

Great help for my neuropathy. Very compassionate and caring staff.
