The O-Shot or G-Shot

Ladies, you are going to love this. The O-Shot, or Orgasm-Shot, is an injection into the clitoris and in the area of the vagina known as the G-spot, or Grafenberg spot. The G-Spot is an erotic zone within the vagina near the urethra. This treatment uses regenerative medicine products such as plasma, amniotic tissue allograft, or human biologics to enhance your sexual arousal and urinary stress incontinence. The O-shot includes benefits that are remarkable and long-term.

Benefits of the O-Shot

This is an ideal treatment if you are looking for:

- Greater sexual arousal
- A tighter introitus (vaginal opening)
- Stronger orgasms
- Decreased pain for those with dyspareunia (painful intercourse)
- Increased natural lubrication
- Decreased urinary incontinence (both urge and stress problems)
- More frequent orgasms
- Increased sexual desire
- Increased ability to have a vaginal orgasm

HOW MANY O-SHOT TREATMENTS WILL I NEED?

Some effects are noticeable after only one treatment. Full results can appear after one week and last up to six months. However, every individual and every case is different. Treatment options and range vary depending on the extent of the problem. The best results were found after 1 to 4 treatments.

- + WHAT ARE THE NEXT STEPS? >

Minky B.

★★★★★

Though I was nervous about my procedure, management and staff brought a lighter image my way that made my time at Water's Edge remarkable. Nurse Judy is AMAZING! God Bless you all.

Del G.

★★★★★

I have enjoyed my experience with Waters edge medical, they are taking a personal interest in me and helping me get through my neuropathy issue. I still have a ways to go but I'm sure and have confidence they will continue to help me.

Randy N.

★★★★★

Great help for my neuropathy Very compassionate and caring staff.
